contributors

Tacoma freelancer and frequent Arches contributor Mary Boone (she wrote three articles for this issue) has written for dozens of regional and national magazines, including People, Teen People, Entertainment Weekly, and Running Times. She is the author of 12 contemporary biographies for young readers and fears she knows more about Hilary Duff and 50 Cent than any adult should. When she's not writing, she teaches writing at the Tacoma School of the Arts.

John Finney '67, P'94 ['"Remembering Deep Creek Lodge," page 20] is faculty emeritus at Puget Sound. He served for 31 years variously as registrar, director of institutional research, and associate academic dean. After retiring in 2007, he began volunteering in Puget Sound's archives, heading up a project to digitize the photograph collection. He tells us that one of his favorite television programs is PBS's History Detectives, and that he likes to think of himself as Puget Sound's own history detective. "Every photograph tells an important story about who we are," he says, "and digging out the stories is pure fun." Some of these stories appear in the "From the Archives" column John writes for Arches.

Greg Groggel '06 ['"Citius, Altius, Fortius," page 18] says he owes a towering debt to his former professors, particularly those who let him miss three weeks of class during his final semester in order to taxi Olympic athletes around Torino as a runner for ESPN. Currently the Omaha, Neb., native works as an editorial researcher for NBC, after serving as an online producer for the 2008 NBCOlympics.com Web site, for which he won an Emmy. His work has appeared in The Wall Street Journal, SportsBusiness Journal, MSNBC.com, Deutsche Presse-Agentur, and China Daily. The 2010 Olympic Winter Games will be his second with NBC, fourth in some working capacity, and sixth overall.

David B. Williams ['"The Meaning of the Mechanism," page 5] writes about the natural world from Seattle. He is the author of Stories in Stone: Travels Through Urban Geology and The Seattle Street-Smart Naturalist: Field Notes from Seattle. He wishes only that he could see the original Antikythera Mechanism.

Arches is on Facebook

Become a fan and get links to online alumni stories not covered in the magazine, behind-the-scenes news from Arches World Headquarters, outtakes from photo shoots, and occasional random thoughts from the editors.

Ever since we published the 25 Things We Love About Tacoma edition of Arches in 2006, people have been asking us for a reprise. We plan finally to relent in spring 2010 with 25 More Things We Love About Tacoma. We've got a few ideas—the Karpeles Manuscript Museum, Gary Larson, Frank Herbert, it's not Federal Way—but need more. Lots more. We'd love to hear about the places and things you love about Tacoma. The more obscure, the better. Any and all suggestions encouraged, welcomed, and gratefully accepted for consideration. E-mail arches@pugetsound.edu.

Arches is printed with soy-based inks on paper that contains at least 10 percent post-consumer waste. The paper is certified by SmartWood to Forest Stewardship Council standards, and it is manufactured 20 miles from where Arches is printed and mailed.

**The meaning of the mechanism**

The full function of a 2,100-year-old planetarium-in-a-box has confounded scientists for decades, but a team of UPS profs may just have some answers.

It's a long way from the Greek Isles to Thompson Hall, but if you follow the trail you will find a remarkable machine in Professor of Physics Alan Thorndike's office. The contraption, which Thorndike built from scratch, has an elaborate set of interlocking gears sandwiched between five vertical Plexiglas sheets. The back face displays two bronze spiral dials, each with a wheel tracking its spiral. On the front face are two circular scales painted on the Plexiglas. Within the circles five short bronze arms spin on five axes. Two larger arms, with markers pointing to the circular scales, extend from the center of the scales, like an hour and a minute hand.

You'd be forgiven for thinking the really cool-looking device is some kind of clock, given Thorndike's interest in mechanical motion and the several clocks he's built that are ticking and chiming away in his office. It doesn't tell time, though. At least not in the way a casual observer might expect. Instead it tells a story—of Greek astronomy and of modern science. It is a story that began more than 2,200 years ago when the Babylonians and Greeks were beginning to penetrate the mysteries...
of the sky. It is a story that could not be told until the development of high-tech tools such as digitized X-rays and computer tomography. It is a story that is rewriting the understanding of the history of technology.

Thorndike made his device with the help of Puget Sound physics professor James Evans and visiting scholar Christian Carman. One of only a handful like it in the world, the UPS machine is a model of the Antikythera Mechanism, a wood and bronze implement found in a shipwreck near the Mediterranean island of Antikythera, about 50 miles off the Peloponnesian Peninsula. In 1900, while searching for sponges, diver Elias Stadiatis chanced upon a wreck in 140 feet of water, littered with pottery as well as bronze and marble statues. To prove his discovery, Stadiatis collected an oversized right arm and swam to the surface. Later that year, divers, under the direction of an archaeologist from Athens, returned to Antikythera to bring up the encrusted relics.

Scholars began to examine artifacts from the wreck, but they overlooked item number 15087, a dictionary-sized corroded lump. It sat in a caged enclosure for months, until May 1902, when a researcher noticed that the lump had split open, revealing an inscribed bronze plate and finely cut gears.

Which totally didn’t make sense.

Although several ancient Greek texts mention gears, the devices they describe are all fairly simple. Historians of science and technology had therefore thought that elaborate gearing did not develop until the 1300s, when large astronomical clocks first appeared in Europe.

Progress on understanding the Antikythera Mechanism proceeded slowly, mostly because of the fragmentary and corroded nature of the pieces. The first researchers believed it to be an astrolabe, a device invented in Greece and used for navigation and to tell time. Others thought the mechanism substantiated a first-century BCE account by Cicero, in which he wrote of an instrument that had been built by Archimedes but stolen by the Romans after the sack of Syracuse in 211 BCE. According to Cicero, Archimedes' machine reproduced the movements of the sun and moon, as well as the five planets then known: Mercury, Venus, Mars, Jupiter, and Saturn. A similar device was attributed to the Stoic philosopher Posidonius (first century BCE).

Not until the early 1970s did scholars start to piece together the instrument’s true story. Princeton professor Derek de Solla Price had been studying the Antikythera Mechanism since the early 1950s when, in 1971, he received permission from its owner, the National Archaeological Museum in Athens, to take X-rays of it. Price’s work revealed a far more complicated mechanism than anyone had suspected. “It transcends all that we had previously known ... and may involve a completely new appraisal of the scientific technology of the Hellenistic period,” he wrote in his landmark paper “Gears from the Greeks,” published in 1974.

“Price got a lot right, but not all of it,” says Evans. An expert in ancient astronomy, Evans bases his statement in part on work conducted during the past decade by a Greek and British team, headed by the astrophysicist Mike Edmunds of Cardiff University and the filmmaker and mathematician Tony Freeth. Using high-resolution surface imaging and three-dimensional X-ray tomography (imaging in sections), the researchers doubled the number of textual clues to the machine’s purpose and for the first time showed the full complexity of the Antikythera Mechanism.
and of the Cardiff University group, the Puget Sound team, which now included Thorndike, an expert in mechanics and machine work, narrowed its focus to two questions. The first centered on the device's beautiful lunar mechanism.

"If they went to this much work to model the lunar anomaly, they must have done the same with the sun, which also travels at different speeds," says Evans. But no one explained the solar anomaly in the Nature articles.

Other researchers had recognized this deficiency and made proposals, but they were too complicated, says Evans. In keeping with the elegance of the mechanism, the UPS team proposed a simpler solution. They based their work on an observation of Carman's that the dividing lines on the zodiac and on the Egyptian calendar scale did not match up uniformly. In other words, as an arm spun around at a consistent speed it would appear to move along the zodiac at different rates. This would account for the solar anomaly, but the same zodiac also had to account for the lunar anomaly, and a nonuniform scale would not work for such motion. In order to show the lunar anomaly, they proposed that the lunar arm would have to revolve around a point slightly off center, which would compensate for the nonuniform division of the zodiac.

Evans and Carman initially worked out their proposal mathematically. They then turned to Thorndike to fashion a gear mechanism. He tried several methods before hitting on a solution.

"Alan really protected us from making implausible proposals," says Evans. And when you watch Thorndike turn the wood and bronze crank of the Puget Sound Antikythera replica—the 30 bronze gears and cogs meshing perfectly to turn the two pointers that indicate the solar and lunar anomalies—it is clear their solutions work.

The second question was how and if the mechanism displayed planetary motion. The Puget Sound professors propose that the front face contained five additional dials that would spin independently of the lunar and solar pointers. Again they began with a mathematical model, based on a well-attested, coherent set of Babylonian periods for the planets, and had Thorndike fabricate a gear system.

"It is extremely conjectural because so little gearing remains for this part of the mechanism," says Evans. "The nature of the planetary display is the single biggest unresolved problem."

Ultimately, says Evans, we can neither know exactly what the Antikythera Mechanism showed nor why its maker made it. Was it some guy just showing off? The Greeks did have a strong interest in "wonderworking," or the art of making elaborate machines with clever motion using air, water, inclines, or cables. Or was it to show a sense of intellectual elation at undoing the celestial secrets and modeling how they worked? "The meshed gears are a great metaphor for the meshing of cycles," says Evans. "Here's how the heavens work and here's how our minds figured it out. It is very elegant."

The professors presented their ideas and a close-up look at the astonishing model on campus at this semester's Daedelus Lecture on December 2. In February their paper "Solar Anomaly and Planetary Displays in the Antikythera Mechanism" will appear in the Journal for the History of Astronomy. — David B. Williams

Good riddance to fall ’09

As I finish writing this installment, the first semester of my junior year has come to a close and I am on winter break. In all honesty, I have never been so happy to see a semester end, and I anxiously await the end of 2009 along with it. This year has prompted numerous personal challenges that I was not ready to face, but I had no choice but to tackle them head-on, and I learned a lot of valuable lessons the hard way. Overall, the negative experiences I have faced over the course of this year have helped me immensely because they have helped me appreciate myself more. I am learning to accept who I am as an individual and no longer depend so heavily on the approval of others to validate me.

In my previous articles I discussed my role as the chapter president of Alpha Phi. While it was a great learning experience, I am happy and relieved to say that I have finally passed the torch and no longer bear the burden of responsibility. After a year of carrying around that title, I am ready to distance myself from the position and all it entails. I am ready to be seen as an individual as opposed to being the face of an entire group of people. What made the job so challenging, aside from the constant and very often overwhelming demands, was the loss of my personal identity that came along with all of it. I felt as if I always had to be "on" in the presidential role. I had to have the answers to everyone’s questions and the solutions to everyone’s problems when I often couldn’t even solve my own. The role caused me to be way too hard on myself all the time, which is an issue I’ve always struggled with whether I’m president or not. Now that it’s all over I can easily say a huge weight has been lifted off my shoulders.

Another challenge I have had to face over the course of this year was having to deal with getting my heart broken for the first time. I know it’s something everyone goes through and is all a part of growing up, but it definitely didn’t make the semester any easier.

Looking back on it all, I’ve learned a lot from these experiences. I’ve learned that no matter what, I need to be completely honest with myself about what I want and what I deserve. I also learned that it is never a good idea to change who you are in order to please someone else. As corny as it sounds I’ve learned that being true to myself is the best way to go. Though junior year has presented a lot of obstacles so far, I am grateful for all of them because I have never felt more comfortable in my own skin as I do right now. Being able to say that and truly mean it is far more rewarding than any title I could have or boy associate myself with. Although I have experienced tremendous growth, I’m still excited to see 2009 go because I’m excited to see what 2010 has in store. — Lestraundra Alfred ’11
Together with TCH, 100 years of shared values

As a religion major, Susan Gershwin '05 recalls spending hours in lectures focused on big-picture philosophical questions.

"We had readings and papers about liberation and oppression, and how do we, as individuals or groups, create the kind of world we want to live in," she says.

They were questions that might have been overwhelming had it not been for Gershwin's work-study job as a literacy tutor at Tacoma Community House.

"I worked with such a range of people, from women who didn't understand that letters were read left to right and that when you put groups of them together you could form a word, to those who were earning their GEDs and then going on to Bates [Technical College] and becoming the first in their families to attend college," she says.

Those experiences gave Gershwin a chance to connect what she was learning in class to her own life. It also gave her direction for the future. She now works as education and community outreach manager at a refugee resettlement agency in Denver.

"I came to UPS like a lot of students, not having any idea what kind of career I wanted. But my experience at TCH flipped the switch for me. I realized I was a 19-year-old college kid, but I still had the skills to help these immigrants or high school dropouts improve their lives. It was a pretty empowering time for me."

Gershwin still has Santos Nunez's phone number in her cell phone contact list. He was the first TCH client she helped earn a GED.

"He was 38 years old and had a daughter, and I thought, what could I possibly teach him?" she says. "It didn't take long for me to figure out I was in college to improve myself, and he and the other TCH students were there to improve themselves. It felt good to be part of that, to know that I played a small part in helping him get a better job and create a better life for him and his family."

That's the sort of victory being celebrated this year as staff and volunteers at Tacoma Community House prepare to celebrate the organization's 100th anniversary.

Photojournal by Ross Mulhausen

OCT. 30: FRIGHTFULLY GOOD CAUSE Phi Delta Theta's haunted house collects more than 300 cans of food to benefit area food banks, while delighting nearly 200 kids from the Al Davies Boys and Girls Club and several church youth groups in the Hilltop area of Tacoma. Chapter advisor Dom Federico '67 (that's him in the center, flanked by ghouls Marcus Luther '11 and Aaron Badham '11) opens his house each year for this fundraising event. It is the fourth year the fraternity has transformed Dom's place.

NOV. 6: THE STAGE IS SET Theatre Arts prof Kurt Walls gets help from librarian Lori Ricigliano designing the set for the on-campus production of Thornton Wilder's The Skin of Our Teeth.
Founded in 1910 by Methodist deaconesses who wanted to aid Italian immigrants in Tacoma’s Hilltop neighborhood, the nonprofit continues to serve Tacoma’s newest refugees and immigrants. It provides interpretation services, literacy tutoring, and immigration and social services assistance, and has helped thousands of individuals earn their GEDs.

The work is made easier thanks to the thousands of hours of paid and volunteer service provided by Puget Sound students and staff.

“One of the biggest assets Tacoma Community House has is its staff,” says Derrick Rhayn, TCH’s development and communications officer. “Still, we’re a small crew, and we have so much work to do that there’s no way we could accomplish it all without volunteers. Many, many of those volunteers have come to us from the University of Puget Sound.”

Rhayn says shared Methodist roots are surely part of the reason behind the decades-old relationship between TCH and Puget Sound. But Puget Sound Executive Assistant to the President Liz Collins thinks there’s more to it than that. “There’s a real confluence of vision and mission between the two institutions,” says Collins, who has served on TCH’s board of directors. “Serving others is what we’re drawn to.”

— Mary Boone

Did you volunteer or work at Tacoma Community House?

As Tacoma Community House celebrates a century of service, it hopes to reconnect with the people who contributed to its success. If you were a volunteer or work-study student at TCH, Derrick Rhayn, the communications director there, would like to hear from you. Derrick is eager for any kind of information—from something as simple as your name and the years you were affiliated with TCH to more detailed memories of your service. You can write him at DRhayn@tacomacommunityhouse.org or phone 253-383-3951. Throughout 2010, TCH will host a number of events and activities to commemorate its 100 years of service. To learn more, visit: www.tacomacommunityhouse.org.

Did you volunteer or work at Tacoma Community House?
GOING UP ON CAMPUS  Construction on the Center for Health Sciences is expected to begin in the spring. The building will be sited facing Baker Stadium, across the street from the field house. You can watch construction progress at www.pugetsound.edu/chs.

the campus

Center for Health Sciences moves one step closer to construction

Construction documents are nearly complete and the permitting process with the city is underway for an important part of Puget Sound’s 20-year master plan: the Center for Health Sciences.

Architects Bohlin Cywinski Jackson of Seattle were given the challenge of meeting the needs of five programs of study under one roof: the departments of psychology and exercise science, the new neuroscience program, and the schools of occupational therapy and physical therapy. The design incorporates state-of-the-art clinical spaces and an outdoor mobility park for occupational therapy and physical therapy, to be used both for teaching and serving some 300 public clients; a biomechanics motion analysis and exercise physiology laboratory; animal learning and laboratory spaces; and a psychology research suite. The building also will house classrooms, computer labs, and faculty offices.

The structure’s design echoes the campus’ Tudor-Gothic architecture, with gable roof forms, projecting bay windows, and materials such as brick, stone, and terra cotta. The facility will comprise four levels and 42,500 square feet, and will be built to meet the U.S. Green Building Council’s LEED “silver” standards, using sustainable materials and adhering to stringent environmental guidelines. The building will be on the north side of North 11th Street between Alder Street and Union Avenue, across from Memorial Fieldhouse and Baker Stadium.

Architect Peter Bohlin recently was awarded the 2010 AIA Gold Medal, which recognizes architects whose body of work is deemed to have had a lasting influence on the theory and practice of architecture. His designs often incorporate glass or transparency to give sweeping views of the outdoors and to fill the interior with natural light. Examples of his work include Seattle City Hall, Ledge House in Maryland’s Blue Ridge Mountains, the Apple Store on Fifth Avenue in New York City, and the Pocono Environmental Education Center in Dingmans Ferry, Pa.

Gifts from alumni, parents, friends, corporations, and foundations will comprise a significant portion of the funding for the facility. Depending on the progress of fundraising, at its March meeting the board of trustees will decide whether or not to give the go-ahead for construction. If they do, groundbreaking for the $22 million project will be in May, with opening anticipated for autumn 2011.

Major gifts to the project so far include those by Robert and Rebecca Pohlad P’07 and the Pohlad Family Foundation; the Ben B. Cheney Foundation; Eric and Hollis B.A.’84, J.D.’88 Dillon; Carl and Renee Behnke; and Guy B.A.’75, M.B.A.’76 and Audrey Watanabe.

kups radio

‘The Sound,’ supreme

The staff of student-run KUPS let out a collective hoot on the afternoon of Nov. 12 as an MTV cameraman burst in and New York disc jockey Matt Pinfield declared KUPS the winner of the 2009 Radio Woodie. The Puget Sound students knew only that their station was one of five finalists and that a 1 p.m. phone call would announce the winner. “The wait was killing us,” said station manager Carmen Bria ’10. A short time later the television crew swept in and Pinfield handed over the trophy—a chunk of wood with a hammer and wedge, aka the mtvU Woodie Award. KUPS “The Sound” beat out about 300 U.S. college radio stations when it tallied the most votes nationwide. The ceremony was broadcast on Dec. 4 on mtvU, MTV, MTV2, and Palladia.
Three new trustees; two returning

Timing can be everything. Kathleen McCarthy Duncan '82 was asked to serve as a Puget Sound trustee a number of years ago, but her schedule simply wouldn't allow it.

"When Ron Thomas became president, he came to talk to me about it again," she recalls. "I knew I wanted to do it, and we picked this as the year. I'm glad I waited because I couldn't have devoted the time to it before. I'm still busy, but I'm committed to making this work. This is something I've wanted to do for a long time."

Duncan grew up in Westwood, Calif., and was lured to Puget Sound by a recruiter visit at her school. After a campus visit, she was sold.

"I thought it was the most picturesque place. I fell in love immediately," she says. She recalls a short bout of homesickness that was overcome by joining a sorority, Gamma Phi Beta, and participating in a semester-at-sea program. "It really was a terrific experience."

After graduating with a major in psychology, Duncan returned to California briefly, then attended secretarial school out East to learn basic office skills. She landed a job in U.S. Sen. Pete Wilson's office and later worked in human resources for Chase Manhattan Bank. In 1988 she earned her teaching certification from Mount St. Mary's College and then taught for five years before marrying Adam Duncan; the two have three children: Kara, 14; Alex, 12; and Patrick, 10.

Duncan now serves on the board of the Thomas and Dorothy Leavey Foundation, a not-for-profit foundation with more than $235 million in assets. The foundation, founded in 1952, primarily focuses on health care, social service, and culture.

In addition to her work with Puget Sound, Duncan has served on the Mount St. Mary's College board of trustees. She's also volunteered with the Children's Bureau of Southern California, on the Doheny Eye Institute board, and with Children's Institute's C.H.I.P.S. (Colleagues Helping in Philanthropic Service).

"Being on the Puget Sound board of trustees is a big commitment, but I'm looking forward to it, and it's great to be back on campus," she says. "My experience on Mount St. Mary's board was good, but because that's a small, all-girls college, I think this experience is going to open up a whole new world to me. I'm looking forward to the challenge."

Gwendolyn H. Lillis of Colorado, chair of The Lillis Foundation, also has been named to Puget Sound's board of trustees.

Lillis received a bachelor's degree in languages and a master's degree in finance, both from the University of Colorado. She earned her doctorate in business strategy from Northwestern University. A former assistant professor in the University of Colorado Business School, Lillis previously served as chair of both the University of Northern Colorado Foundation and University of Oregon Foundation boards of trustees. She is a former member of the Monfort College of Business dean's council at the University of Northern Colorado and the steering committee for Educare Colorado, a nonprofit initiative partnering with parents and child-care providers to improve the quality of child care and preschool.

Lillis and her husband, Charles, established The Lillis Foundation in 2000. The private foundation's primary purpose is to help youth and young adults reach their full potential through education. In 2007 The Lillis Foundation established the Lillis Scholars Program at Puget Sound. The gift, the largest expendable donation for financial aid in the university's 122-year history, offers full, four-year scholarships to two academically gifted students each year.

Gwendolyn and Charles Lillis are the parents of Puget Sound alumna Jessica Baker Isaacs '05.

Barb Walker couldn't help it. When her children, Josh '05 and Jeff '08, enrolled at Puget Sound, she became involved as a volunteer with the Parents Council, Alumni and Parent Relations Task Force, and Parents Fund Committee.

Even though her sons have moved on—Josh is a student at the University of Washington's School of Dentistry and Jeff works for the University Place Fire Department—Walker continues to devote her time and energies to the college. She's on the Logger Club Board and was recently invited to become one of Puget Sound's new trustees.

"Being involved is just part of my nature," she says. "Getting involved provides me with the opportunity to learn and get to know some truly outstanding people. It's also a good way to give back, which is extremely important to my husband and me."

Walker says her belief in the value of education is just one reason she's drawn to service on the board of trustees.

"I look forward to learning more about Puget Sound, to working with a dedicated group of incredible people, and to being able to work with President Thomas and the rest of the cabinet. I want to see Puget Sound continue to move toward fulfilling its strategic plan," she says.

"I'm also grateful for the opportunity to grow and develop my own skills."

Walker is the bookkeeper in her husband Mark's Kent, Wash., dental practice. It's a position that allows her the flexibility to do volunteer work, play golf, snow ski, and watch the Loggers and Huskies play.

A graduate of Central Washington University, Walker says her own collegiate experience was a good one.

"But it didn't develop the sense of passion one gets at Puget Sound," she says. "Puget Sound is unique. Even when it's through your children, the Puget Sound experience develops passion."

Re-elected to and rejoining the board this year are two distinguished former trustees, Holly Sabelhaus Dillon '84, J.D.'88 and Michael J. Corliss '82. Holly is a partner in Heidi Says boutiques. Mike is CEO of Investco Financial Corporation and the father of Eben Corliss, a member of the Puget Sound Class of 2013. — Mary Boone
An enchanting read

Enchanted Evenings: The Broadway Musical from Show Boat to Sondheim and Lloyd Webber

Geoffrey Block, professor of music
480 pages, paperback
Oxford University Press
www.oup.com/us

Review by Keith Ward

Are you a Broadway musicals fan? An aficionado? A casual listener who goes to a musical occasionally and afterwards wishes you went more often? Are you fascinated by the twists and turns of historical narrative? Someone who likes the backstory? Or are you a former student of Geoffrey Block's who took his course on the Broadway musical, sold the text at the end of class, and now wish you hadn't?

If any of the above apply, then a treasure awaits you in the second edition of Enchanted Evenings: The Broadway Musical from Show Boat to Sondheim and Lloyd Webber, written by Distinguished Professor of Music History Geoffrey Block and released in October by Oxford University Press. Block explores more than 75 years of the Broadway musical as told through 17 works that include such great classics as Anything Goes, Guys and Dolls, My Fair Lady, and West Side Story. With an expanded chapter on Stephen Sondheim, a new chapter on Andrew Lloyd Webber, even more new chapters delving into the world of film adaptations of musicals, and an online site, the second edition gives an insightful and illuminating look at a beloved musical genre, told by an author who is more than just keenly interested in the subject. He's passionate about it.

Enchanted Evenings is organized like a musical itself, with an overture ("Setting the Stage"), a first act ("Before Rodgers and Hammerstein"), a second act ("The Broadway Musical After Oklahoma!"), and concluding with an epilogue ("The Age of Sondheim and Lloyd Webber"). Within each chapter is a detailed, often fascinating narrative on the subject musicals. Using letters, logs, notes on scores, sketches, interviews, libretto drafts, and manuscripts, Block shows how nonlinear and unpredictable the creative process can be, with interesting, sometimes amusing, other times surprising digressions and revisions (and, on occasion, intrigue). He also delves into musical and character analysis, each musical's reception, and reflections on the works' value in the genre. Peppered throughout are photographs from rehearsals and performances, musical examples, and caricatures of Broadway composers by Al Hirschfeld. The companion Web site offers a wealth of material that includes synopses, a discography and filmography, lists of changes from pre-Broadway tryouts through recent revivals, long and longest runs since 1920, published librettos and vocal scores, and extensive chapter notes that provide helpful information (what's the difference between a book musical, an opera, an operetta, and a revue?), context (what are some of the musicals that set the stage before Show Boat's opening in 1927?), sources (other recommended histories of the Broadway musical), and further commentary on characters, performers, writers, and musical structure.

So what, then, is this book? A history? A source book? A critical appraisal of the music and the drama? It is all of these. Put differently, Enchanted Evenings has something for everyone.

Why are musicals memorable? This question lies at the heart of the book. As Block shares in the preface, his affection for musicals began in childhood, when he was influenced by their ubiquity in the musical landscape at home. It was later that the scholar Geoffrey Block turned his critical eye to them, arguing—and as this book shows persuasively—that these works both deserve and stand up to critical musical analysis.

Block's central claim is that the value in musicals comes from more than just a few good tunes. Instead, their significance, quality, and memorability lie in their success in drawing connections between music and meaning. Block's analyses provide examples that help us understand the evolution of the integrated musical (that is, a musical in which songs—and, in some cases, dance—play roles in advancing the plot, and in which relationships between musical motives and their transformations in new contexts support character and plot development). We also learn how a concept musical (such as Sondheim's Company or Kander and Ebb's Cabaret), which integrates content around an image or idea instead of a plot, holds together. His assessments are not those of an uncritical fan. As often as he praises works, he cites what he or others view as shortcomings, such as Maria's use of dialogue instead of song at the close of West Side Story, or why Lloyd Webber's reuse of themes in blockbusters like Phantom of the Opera actually weakens the drama, despite the show's other outstanding qualities.

This book teaches us to listen to musicals differently, and positively so. To use one example, Rodgers and Hammerstein's Carousel can be enjoyed without critical commentary. However, Block's explanation and analysis of how the characters are sketched musically to support thematic unity, of why the bench scene between Billy and Julie is more powerful because of Rodgers and Hammerstein's success in integrating music and words, of using music to foreshadow underlying feelings, and of reprising a melody or motive for the sake of the drama (as opposed to bringing it back simply because it's a great song), takes us deeper into the work. In the end we are even more enriched and entertained.

Block's book also takes us into the world of Broadway. He introduces important figures in the world of musicals (Harold Prince, for example), and we learn about the frequent, sometimes profound changes to musicals when they are adapted for film. There are digressions, like his sketch of Andrew Lloyd Webber's career. We learn why the 1950s were so special for the American musical and what Hammerstein thought made a good lyric. And we learn colorful tidbits: That, for example, Richard Rodgers almost left composing musicals in the 1920s. Or that West Side Story began as East Side Story and as a conflict between Catholics and Jews. Or that Cole Porter added the song "Bianca" to Kiss Me, Kate when Harold Lang "pulled a snit" because his contract said he had to have a song in the second act. (Porter, according to Patricia Morison and Miles Kreuger, "decided to write something that is going to be so bad that they won't keep it in." They did.) Or that the film version of Sweeney Todd,
starring Johnny Depp, took cinematic tricks from MTV. Such passages and quips throughout the book bring us closer to the richness, intensity, and complexity of life surrounding the Broadway musical.

Anyone walking by a classroom in the music building when Professor Block is teaching knows of his intensity. This spirit you will find on every page of Enchanted Evenings—of an author thoroughly engrossed in the topic, well versed in the subject, and laudatory as well as critical of the content at hand. Whether one reads selected chapters of Enchanted Evenings or from cover to cover, it is a very satisfying, illuminating, and—dare I say?—enchanting read.

Keith Ward is a professor of music at Puget Sound and director of the School of Music.

**Atom Age Vampire**

**Scott Bateman '86**  
70 minutes, DVD  
www.atomagevampire.org

Vampires have been haunting literature since they first turned up in early 18th-century poetry and have been going strong in various media ever since Bram Stoker wrote Dracula in 1897. One could make a case that this is the vampire’s heyday, or hey-night, given the success of television programs such as Buffy the Vampire Slayer and the current Twilight craze.

Despite the proliferation of vampire culture for nearly 300 years, Scott Bateman enters into the bloodsucking genre with a film the likes of which we have not seen before. His animated *Atom Age Vampire* is a spoof of a truly dismal 1960 Italian flick of the same name, directed by Anton Giulio Majano. Bateman has taken the horrible, English-dubbed soundtrack of the original film and pasted animation over the top of it, to absolutely hilarious effect. Here’s the plot: Jeanette Moreneau, a stripper at Stretchem’s dance club, gets dumped by her pirate boyfriend Pierre. Pierre goes off to sea and Jeanette, possibly distracted by her perpetually spinning tassel, gets into a horrible car crash. Her stunning stripper beauty is disfigured, but the mad scientist Dr. Levin gets Jeanette out of the “crappy screenplay unit” of the local hospital with the promise of a cure. We know Levin is a mad scientist because his name tag says “Evil” and because his animated eyebrows bob up and down one after the other. Levin’s cure is somehow related to the cancer patients upon whom he’s been doing research after the atomic bomb blasts. A love triangle develops between Jeanette, Dr. Levin, and his goth chick assistant Monique. Eventually it becomes something of a love pentagon, as Pierre returns to rescue Jeanette, and even Sasha, Levin’s cyclops gardener and errand man, seems to have an eye for the lovely stripper.

It would have worked out except for one thing: The cure, a serum called Derma 28 that is made from the glands of recently deceased women, is not permanent, and women are not dying off fast enough to keep up with demand. To alleviate that, Dr. Levin dispatches Monique and a few others. Eventually he shoots himself up with Derma 28, hits the radiation chamber, and becomes a glowing, green, vampire/mad scientist murder machine, collecting victims and glands to keep Jeanette perpetually beautiful. Sasha finally stops the carnage by slaying Levin with a garden trowel. We all know this isn’t how you kill a vampire but, hey, whatever.

This is a story ripe for satire, and Bateman is up to the task. For added hilarity, and in a nod to the old TV series *Mystery Science Theater 3000*, he runs a constant commentary of snide remarks about the movie in running text alongside the animation. My favorite: When Levin explains to a bumbling cop that a dead patient had suffered from dizzy spells and palpitations, the comment that appears is “She died from Beatlemania?” *Atom Age Vampire* is crammed with other pop-culture musical references, including mentions of Def Leppard, Phil Collins, and even the legendary Charlene of “I’ve Never Been to Me.” The animation itself surprises with funny details, like the gauges on one of Dr. Levin’s lab machines measure “Karloff’s” and “Lugosis.”

Bateman is best known as a syndicated cartoonist, but his fame as an animator is on the rise, says *Animation Magazine*. He has produced a weekly animation for Salon.com for the last three and a half years, and has also made numerous shorts. His work has appeared on MTV and BBC World Service. *Atom Age Vampire* is his first feature-length animation. — Greg Scheiderer

**Respiratory Notes (2008)**  
**PFT Notes (2010)**

Gary C. White '76  
F.A. Davis Company, [www.fadavis.com](http://www.fadavis.com)

In a high-cyber world where there seems to be an app for everything, clinicians may be relieved to find that the pocket guide medical notes series from F.A. Davis uses no batteries and never crashes. Gary White, who is director of the Respiratory Care Program at Spokane Community College, has authored two such Davis guides in his specialty: Respiratory Notes, for respiratory therapists, and PFT Notes, for pulmonary function testing.

The guides, with spiral-bound pages just bigger than 3x5 cards, are full of well-illustrated tools: forms and checklists for gathering data at the bedside, flow charts to aid diagnosis and treatment decision making, lists of accepted standards, comparisons of drugs, and tips on techniques. The guides also offer advice on bedside manner, cultural competency in care, and practice guidelines. The pages of the guides are coated so that they are waterproof. Also, any notes taken on the forms can be easily wiped off, making the guide compliant with patient privacy guidelines and ready to use again and again. — GS
In Pat’s Tavern on St. Patrick’s Day, a cast of 16 players wonders if a town like Tacoma can help a person figure things out

A short story by Richard Wiley ’67

Pat’s Tavern, on 21st Street, not far from the old LaPore’s Market, had been the best college drinking establishment in Tacoma, Washington, a decade earlier, but when I worked there it had started its coast into oblivion, with Vivian Flanagan running it and finding people like me to tend bar. Her husband, Pat Flanagan, managed the tavern during its heyday, hiring College of Puget Sound athletes and tough guys like himself, but not many years after the College of Puget Sound became the University of Puget Sound, Pat’s Tavern lost its cool and even on weekends it wasn’t full. Still, a schooner of beer cost a quarter and I and my fellow bartender, Marsha, often gave beer away to friends on a one-and-a-half-to-one kind of deal. By that I mean we would sometimes lift their schooners from in front of them, top them off under the tap, and put them back down. Marsha wore Coke-bottle glasses with unruly hair falling all over the place, while I kept a copy of Siddhartha in the pocket of the army jacket I had taken from my father’s closet. It was the spring before the Summer of Love, St. Patrick’s Day, and Pat himself was in the corner booth with two other Irishmen, pointing out the photos on the walls.

Fatty was actually thin, with the face of James Cagney. "Harold Berg," Fatty said. "H-a-r-o-l-d B-e-r-g."

Earlier they had been playing Irish Spelling Bee, a drinking game they’d invented, and Fatty was too drunk now to know that the game had ended.

"Stop lookin’ spelling everything," said Paddy, the third man in the booth. So they were Pat, Fatty, and Paddy, three men in their 60s in a bar owned by Pat and otherwise frequented by kids on the verge of hippiedom, who got their beers topped off by Marsha and me.

"Harold Berg was in last night," I said, bringing the pitcher Pat had ordered for them. Pat himself didn’t drink. Vivian told me that he had once, terrifically, but quit because drinking made the fighting man come out in him.

"Did you give Harold Berg the news about your grandmother?" Fatty asked me, and all three men howled. A few months earlier I had used the excuse of my grandmother’s death to get the weekend off to go to Westport, but my brother came in when I was gone and when Vivian consolèd him over our loss he said she’d been dead for a decade. Vivian fired me the following Monday, but soon enough hired me back.

I didn’t mention my grandmother but asked instead, "Aren’t you Harold Berg? H-a-r-o-l-d B-e-r-g?"

That sent Pat and Paddy into roars of drunken laughter, though Pat, of course, was sober. "Look behind you, Dick," he said. "Viv will fire you again if you don’t start pouring beer."

"For Christ’s holy sake, is his name really Dick?" asked Paddy. "You’ve hired a boy named after his penis, Pat. No wonder your tavern’s gone downhill."

Vivian was short and dough-faced and disliked nearly everyone who came into the bar. Raja and Mahmoud, two exchange students from Saudi Arabia, were at the top of the list of those she disliked, but they were regular customers, sitting and drinking the way some Muslims do when they get to America. "Look at them," Viv said. "Bold as you like and on St. Patrick’s Day, too, just waiting for me to serve them…."

Vivian kept a milkshake container filled with Mogen David wine at the back of the bar by the cash register, and she turned and sipped from it now. "My own bar," she said. "I guess I can serve who I want."

Raja and Mahmoud sat in a booth with some friends of mine: Roy, who’d gone to Westport with me; Cheryl, Roy’s girlfriend; John, recently back in town after graduating from Pomona College in California; and Becky Welles, the daughter of Orson Welles and Rita Hayworth. Becky had a calm and knowing look, more her father’s than her mother’s, and enjoyed coming to Pat’s because we liked her for who she was, and not for her famous parents.

At the bar sat Ralph, an English teacher; Mona, whose husband was doing time at McNeil Island Federal Penitentiary—a much more exotic presence than the daughter of Orson Welles; Bob-the-lawyer, whose wife had left him and who kept trying to get Mona to take him home; and Duke, a philosophy professor. So Pat, Fatty, Vivian, Marsha, Raja, Mahmoud, Cheryl and Roy, John—from-Pomona, Becky Welles, Ralph, Mona, Bob-the-lawyer, Duke, and me. Sixteen characters in search of a play, St. Patrick’s Day, 1967. I haven’t mentioned yet that I dyed my hair green for the occasion, but must mention it now, in light of what Mona said next.

You look good with green hair, Dick." Mona came to Pat’s nearly nightly and often took men home. She enjoyed saying McNeil Island Federal Penitentiary in a low and husky voice, to those she wanted to take. I thanked her but was too busy to stop and chat. I’d been trying to avoid Mona anyway, since she’d said McNeil Island Federal Penitentiary to me about five nights in a row. I hurried off with beer for Raja and Mahmoud and Roy and Cheryl and John and Becky.

"I’d like two burgers when you get a minute, please, Dick," said Mahmoud. "In fact bring two burgers for everyone at the table."

Mahmoud was fatter than Fatty and had a lot more money than everyone. "Cooking’s out tonight," I told him. "St. Patrick’s Day and all."

The beer I had brought them was as green as my hair. John-from-Pomona said he’d go get the burgers at Frisko Freeze and bring them back. John had a motorcycle and one night a couple of weekends earlier he and I took it out along South Tacoma Way, stopping at every tavern, and now we were friends for life. As he headed for the door on the hamburger run, I worked my way back past Duke-the-philosophy-professor, who said, "I know you’ve read On the Road, Dick, but have you reread it?"

When Marsha heard Duke’s voice she came over fast, though people were demanding beer. "I reread the damned thing," she said. "And rereading makes it ordinary. About like you are, Duke."

Marsha and Duke had had a fling a couple of weeks earlier and Duke had said he was moving on. He glared at her like Gertrude probably glared at Ernest, never mind the gender reversal.

Marsha never did much work when Duke was in the bar, and Vivian never did anything but cook and drink Mogen David, so I was busy for the next hour, with both taps open and green beer flowing, and with Bob-the-lawyer trying to offer me his services by writing me a free will. He offered the same thing to Mona, but she was looking the other way. Bob offered someone a free will every night, so it, along with Mona saying McNeil Island Federal Penitentiary and Duke extolling the virtues of rereading, were staples at Pat’s, even when it wasn’t St. Patrick’s Day.

Irish music came from a record player Pat had brought in, and Fatty and Paddy kept trying to make people stop talking while they listened to it. "Shut lookin’ up," was how Fatty put it, standing in their booth so he could be seen.

"Do you mind if John works for a while?" I asked Vivian. "We need someone washing schooners or we won’t have glasses to pour this stuff into in about 10 minutes."

I’d forgotten that John was out buying two burgers each for everyone at his table, but Viv didn’t know who John was anyway, and when she said she’d pay him 10 bucks at night’s end, I asked Ralph-the-English-teacher if he could be John until John got back. Ralph hated Duke, though, and wouldn’t wash schooners if Duke was going to sit there criticizing him, so Becky came behind the bar and tied an apron over her overalls.

"Never mind rereading," said Duke when he saw Becky. "How about re-watching, Rebecca? Everyone’s re-watched Citizen Kane, but did you ever re-watch The Third Man? If you haven’t I’ve got two words for you, Joseph and Cotten."

"J-o-s-e-p-h C-o-t-t-e-n!" shouted Fatty. "He was a bloody Irishman!"

"It’s spelt with an ‘e’ not an ‘o’, ya drunken twit," said Paddy, and when Duke said, "He was not an Irishman," Marsha said, "Duke, you kill me."

"I’ve met Joseph Cotten," said Becky. "And
you’re right, he wasn’t Irish, Duke. He was a working-class guy from Virginia. Had a great big crush on my mom.”

Becky so rarely mentioned her parents that Pat turned the Irish music down.

“He mightn’t have been Irish but he had an Irish heart,” said Fatty.

Becky was washing schooners fast, running them into the soapy water and the rinsing tub and placing them on the drying rack. Orson Welles had come to Tacoma once and she’d brought him into Pat’s, but that was the weekend of my grandmother’s ersatz death and I’d missed him.

“Well, he’s what makes The Third Man,” said Duke.

“What makes The Third Man is the story and screenplay, both by Graham Greene,” said Ralph. “Becky’s dad didn’t direct it, so why be such a sycophant, Duke?”

“He did direct it! Citizen Kane, The Third Man, and The Magnificent Ambergsons. What a legacy! And you’re the sicko-phant, Ralph.”

You’re right on two, but Carol Reed directed The Third Man, Duke,” said Becky.

“Wouldn’t you know it. A woman!” said Paddy. “Women direct the whole fookin’ world.”

“Carol Reed is Donna Reed’s sister,” said Fatty. “And if anyone says Donna Reed isn’t Irish, I’ll meet them outside right now.”

“Sorry to say, Carol Reed is a man, Fatty,” Ralph said.

All three Irishmen doffed invisible hats in honor of Carol Reed’s Irishness, or Donna Reed’s, maybe; then Pat asked Marsha to bring them more beer.

“Thanks a lot for helping,” I told Becky. “And thanks for the story. I’m still sorry I missed your dad.”

“It was you I brought him in here to meet, Dick,” she said.

Vivian had been there the afternoon Becky brought her father in, and so had my brother, and when Viv gave him her condolences over the death of our grandmother, Orson Welles had come to Tacoma once and she’d brought him into Pat’s, and so had my brother, and so had my brother, and so had my brother.

“I could feel warmth coming toward me from two directions, from the crazily cooking fries and from Becky.

“What do you suppose it is about Tacoma that would keep Becky here?” asked Mona. She was asking Duke, but Bob was ready with an answer. “Becky’s not in probate in Tacoma,” he said. “Orson’s not the judge, and Rita’s not the jury.”

I thought that was a terrific answer, but Paddy said, “A person can’t be in probate. What law school did you go to, ya twit?”

“He went to the will law school,” said Fatty from behind him. “Whenever he looks at Mona he thinks, ‘I will if you will; but she won’t have anything to do with him!’

He fell into Pat, roaring at his own joke, while Pat pressed the tips of his fingers together like a spider doing push-ups on a mirror.

“Drunkenness will get you nowhere, Bob,” he said. “Take it from me, the sooner you get over her the better.”

No one but Becky seemed to notice Pat’s mid-sentence shift from his own past drunkenness to Bob’s continued heartache over his wife.
Dick, when my dad came in and met your brother that day I got jealous," said Becky. She had pushed her plate of fries across the bar so I could share them. Duke, by then, having heard the notorious McNeil Island line, had gone to stand behind Mona.

"Nothing to be jealous of, Becky," I said.

I wanted a beer, would have poured myself one had Pat not been watching me, his music turned down so low that no one could hear it but him. Pat had rheumy eyes, a wife in the storeroom, his life mostly behind him.

"Here's the thing about Tacoma," said Becky. "It comes out to meet me, it goes half way... Does it make sense to you, Dick, that a place could feel so welcoming to me?"

Mona stood off her stool, took a quick look at Bob, then went out into the evening with Duke. Bob sat there nodding as I,topped off his beer. Pat's eyes were on me but he was gazing somewhere else.

"Maybe it's only Pat's Tavern that gives you that feeling, Becky?" said Marsha, holding onto Ralph now.

"Maybe," said Beck.

"But I wonder if a town could actually replace people. Do any of you think that a specific geography can act as a hedge against the unabated loneliness of a human heart, whether mine or anyone else's?"

Those were the days when a person could say "the unabated loneliness of a human heart" aloud in a bar.

Becky was asking Marsha and me, but it was Raja and Mahmoud who stopped speaking Arabic, stood out of their booth, and took her question to heart.

"You are talking about Mecca," said Raja.

"Mecca, Medina, and Jerusalem, one-two-three!"

He still had his beer in his hands and was swaying back and forth.

"Listen to what the two Omars are telling you, Becky, dear," said Mahmoud. "Your life should have meaning on the day you die! It is place one must put one's trust in. Place is life's key!"

Mahmoud had tears in his voice but his eyes were dry. Tears were in Pat's eyes, though, as he stood to find his wallet so he could give John the 10 bucks Vivian had promised him. Pat didn't miss much of anything.

Marsha said she would stay and close the bar, since I had done most of the work. Raja and Mahmoud pretended they were going to their apartment, though in fact they were heading somewhere else, in pursuit of the women who would no longer be available to them once they went back to Saudi Arabia. Bob stayed on his stool until Pat asked him to help carry Paddy and Fatty to Pat's car.

That left Becky, John, Marsha, and me, with Vivian in the storeroom, no doubt fast asleep.

Whose story was this, then? It wasn't John's, who went to law school the following fall, and it wasn't Marsha's or Duke's, who drifted away in the days and weeks that followed. I thought at the time that it was my story, of course, but my life took turns after that, that I could not have imagined during my year of working at Pat's. Escape from the war in Vietnam, searching, writing, marriage and children, failure and success...

Was it Becky's story, then, told by someone who knew her well but briefly, and remembered the adage of the two Omars when recently reading her obituary?

Rebecca Welles Manning, 59, passed away peacefully October 17, 2004, at home in Tacoma, Wash. Rebecca is survived by her loving husband, Guy; son Marc; stepchildren Kristine, Michael, Brandi; sisters Yasmin, Christopher, Beatrice; eight grandchildren; and many other family and longtime friends.

Sixteen people, the very number of those who played in Pat's Tavern on that cold St. Patrick's night. Sixteen lives branched out back then, and 16 more coming into my consciousness now, all these years later in Becky's obituary.

Or maybe this was Tacoma's story. Maybe Becky knew that place was the secret of not feeling terrorized by everything.

Editor's postscript: Pat's is still a tavern, still in the same spot on 21st Street, but it's called Magoo's now. One evening Assistant Editor Cathy Tollefson and I decided to punch out a little early and head over to Magoo's to get some ideas for illustrating Richard Wiley's wonderful story, the one you just read. I'd never set foot in Magoo's; Cathy remembers hanging out there as a student in the '80s and was interested to see what had changed. The answer was, not much. It still had a nice pub feel. The walls were still painted green. It still had a lot of UPS-related photos on the wall. The booths along the wall were gone, replaced by pub-style tables and stools. We sat down at one of the tables and ordered a pitcher of a locally brewed IPA. No sooner had we clinked our glasses than a dapper little man dressed in a greenish serge suit and string tie walked in off the street, caught my eye, and made a beeline for our table. He reached into his vest pocket, smiling all the while, and pulled out a paper bar coaster that was stamped on the back, in green, with the word "Leprechaun." He placed it on the table and tapped it with one finger. "That's me," he said. "I'm a professional leprechaun."

Cathy and I looked at each other. We didn't say anything, but she must have been thinking, as I was, "OK, so we're here to get ideas for a story that takes place in this bar on a St. Patrick's Day, and a guy we've never met comes in and walks right up to us and introduces himself as a leprechaun."

I looked around the room. At that moment by my count there were 16 people in there, counting us. The leprechaun—Bill, his name was—told us he'd attended Puget Sound for a while in the late '40s and early '50s, and later had helped install the first computers used for payroll at the college. Then he shook our hands simultaneously, bowed a shallow bow, and took his leave.

—Chuck Luce
In Sarajevo on his Watson fellowship, Greg at the destroyed ski jump facility on Mt. Igman.

Citius, altius, fortius for Vancouver

From Greg Groggel '06, who in a yearlong Watson postgraduate fellowship studied the lasting impact of the Olympics on host cities, thoughts on why the Vancouver Olympic Winter Games matter, especially to us here in the Northwest

SEVEN SCORE AND THREE YEARS AGO, VANCOUVER, B.C.'S FIRST citizen, John "Gassy Jack" Deighton, paddled his canoe into Burrard Inlet and began planning for the 2010 Olympic Winter Games.

Consider that only a slight example of historical hyperbole.

In truth, Deighton (who got his nickname, so the story goes, because he was full of hot air) was there in 1867 to build a saloon and capitalize on the presence of thirsty sawmill workers. The rebirth of the modern Olympic Games was still 31 years away, but the thought of bringing the Olympics to the Pacific Northwest would come sooner than you might think. Vancouver proper and the surrounding British Columbia province have been scheming to host the Winter Games since the early 1960s, when Whistler Mountain ski area was in its early stages of development.

In 1970 the region was selected as a finalist for the '76 Olympic Winter Games—eventually losing out to Innsbruck, Austria—and organizers, disappointed but not defeated, put their Olympic ambitions on hold as their easterly neighbor Calgary hosted the world for the 1988 games.

Redemption would come in 2003 when the International Olympic Committee chose Vancouver over Salzburg, Austria, and Pyeongchang, South Korea, to host in 2010. If by chance you happened to be at the IOC session where the final presentations and voting took place, you would have witnessed a joyous celebration, one featuring an exultant then-Prime Minister Jean Chretien and hockey deity Wayne Gretzky. Back in Vancouver, the sounds of car horns and spontaneous renditions of "O Canada" were heard in the streets.
WE WATCH THE OLYMPICS FOR THE SUBLIME EFFORTS OF dedicated athletes, for their personal narratives, and to learn something about the host nation. During what will amount to a year’s worth of legwork, I have spoken with hundreds of Olympic athletes from nearly as many countries. What I learned is that winter athletes are left to ply their trade on snow and ice in relative obscurity until the world decides their most incredible feats merit incredible attention. While hardly true amateurs, most also have no connection with an international sports industry that has become increasingly more professional in nature. The cynic in us may tend to tune out the sappy stories of athletes overcoming hardships, but the truth is the majority of these athletes actually have experienced financial struggle and sacrifice, have risen above personal injury or setback, and have had to balance their singular pursuit with the requirements of career and family. Their stories need no hype, no dramatization.

Consider multiple-medal-threat Lindsey Vonn, who, after winning a World Cup downhill ski race at Val d’Isere, France, in 2005, was confronted with the tradition of choosing one of two prizes: 1,500 euros or a local calf. The calf is a symbolic gesture to life in the Alps that nearly all winners decline, but Lindsey picked the cow. She named it Olympe, and it now lives on a farm near where the U.S. Ski Team trains in Austria. Or how about world champion bobsled driver Steve Holcomb, who was slowly going blind because of a degenerative eye disease? After a successful new surgery Holcomb is back, whipping down the track at 90 mph and adjusting to what he calls life in high-def. Or short-track speed skater Katherine Reutter, who decided to move away from home to train, after hearing three-time gold medalist Bonnie Blair speak to a group of high school athletes? Or even curling "skip" John Shuster, who doubles as a bartender at his curling club in Duluth, Minn., the same curling club where he met his fiancée?

Stories? The Olympics have plenty.

A REMARKABLE NUMBER OF ATHLETES APPEARING IN Vancouver this February hail from Washington state. Most recognized, of course, is the soul-patched, bandana-wearing Apolo Anton Ohno. In Vancouver, Ohno, who currently has five Olympic medals to his name, could become the most decorated U.S. winter Olympian in history. To accomplish that feat he'll need to win two medals, an increasingly likely proposition. Other Washingtonians include world champion moguls skier Patrick Deneen, bobsled driver Bree Schaaf, alpine skier Scott Macartney, and Federal Way’s very own Apolo-in-the-making, J.R. Celski. The 19-year-old is a similarly charming short-track skater who was at the pinnacle of his sport before falling and slicing open a 7-inch gash in his leg during Olympic trials in September. He’s been blogging about his rehab at www.jrcelski.com/journal. For these Pacific Northwest athletes, the 2010 Games are a home Olympics, and their advantage has hardly been addressed by the media.

OK, SO MAYBE THE OLYMPICS ARE A SENTIMENTAL CIRCUS OF global proportions, but it’s impossible to deny their motivational power. Maybe these Olympic Winter Games will do the very thing that we, critical beings that we are, tend to dismiss: inspire. Maybe in Vancouver they will stir, as they did in me at the 1996 Atlanta Games, the fantasy of a world joined by a simple sporting cause.

But that will be someone else’s story.
In the late 1940s and early 1950s a Puget Sound student-run mountain retreat did much to build enthusiasm in the Northwest for the emerging sport of snow skiing.

When World War II ended, the College of Puget Sound enrolled a great many war veterans whose presence changed the campus climate in positive ways. Many of those young men had shouldered huge responsibilities during the war, and in college they were eager for outdoor physical recreational opportunities to complement their classroom studies. Such opportunities were enhanced greatly when, in June 1948, the Associated Students of the College of Puget Sound acquired Deep Creek Lodge, located 60 miles east of Tacoma on the north side of Highway 410.

The drive to acquire Deep Creek Lodge came from members of the men's ski team, coached by Professor of Chemistry Robert Sprenger, himself an avid skier. Teams from rival colleges with such facilities enjoyed a competitive advantage over Puget Sound skiers, who had to return to Tacoma each day at the end of practice. Ski team members Chuck Howe B.A.'50, B.E.'51 and Clint Gossard '51 therefore began looking for a cabin close to where the team practiced at Cayuse Pass, near the northeast corner of Mount Rainier National Park.

Phil Gossard, Clint's father and White River sales manager for Weyerhaeuser, suggested that Chuck and Clint contact Nevan McCullough, ranger for the Forest Service's White River District, which included Snoqualmie National Forest, outside park boundaries. McCullough knew of a site the skiers could look at, a public tourist camp located on Deep Creek, owned by a man who was about to lose his lease with the Forest Service. The ski team wanted a cabin, but this was something else altogether—a 13-acre facility with two lodges and seven cabins. The owner wanted $6,500 for his buildings, and McCullough told the students he thought the college would be successful if it sought a lease on the land.

Although the possibility of obtaining a recreational facility to serve the entire campus—rather than a cabin just for the ski team—was a new idea, Professor Sprenger had no hesitation in approaching President R. Franklin Thompson, who gave his support. Chuck Howe spoke with ASCPS's central board, which was likewise enthusiastic. The opportunity to lease 13 acres and to purchase the buildings seemed too good to pass up, and the deal was made. Beyond its use by skiers, both President Thompson and ASCPS felt that Deep Creek could serve as the locus for student outdoor activities all year long.

Professor Sprenger, ski team members, and student volunteers went right to work to whip Deep Creek Lodge (as ASCPS officially named the facility) into shape. Over the next 12 months they converted one of the cabins into a small shower and lavatory building. They installed bunk beds, increasing capacity to eight to 10 people per cabin. They built a septic system and a gravity-fed water system. One
CPS ski team members Clint Gossard '51, John Boesel '53, Chuck Jorgenson '51, Weldon Howe '52, and Chuck Howe B.A.'50, B.E.'51 at the college's Cayuse Pass ski area, spring 1950.

of the lodges became a permanent caretaker’s home, while the other became a recreational center. A small powerhouse supplied electricity. A corduroy log road was constructed leading up to a 60-by-100-foot body of water that students and Professor Sprenger cleaned of debris for an ice skating pond. All of this work was completed by student volunteers. Chuck Howe, a surgical technician onboard attack personnel ships in the Navy, had seen action at Iwo Jima and Okinawa. For him and other war veterans, attacking deficiencies at Deep Creek Lodge was easy duty by comparison.

Because Deep Creek Lodge was considered part of the College of Puget Sound campus, social rules there were the same as for the main campus in Tacoma. A November 1948 issue of The Trail published the “Use Rules for Deep Creek.” These included the expectation there would be no “mixed visiting” between cabins. Steve and Jerry Stevenson served as Deep Creek’s full-time caretakers from 1948 until June 1951. This husband-and-wife team acted as chaperones, permitting men and women to use Deep Creek Lodge. (Steve, whose weight fell from 190 pounds to 90 pounds during the Bataan Death March, claimed that the outdoor life and hard work at Deep Creek Lodge contributed to his physical recovery after the war.) Lights went off at 11 p.m., when the Stevensons turned off the power plant. Firewood was not to be chopped inside the cabins. Deep Creek itself was not to be polluted, for which offense the U.S. Forest Service would impose a $25 fine.

The same issue of The Trail published the “Operating Policy of Deep Creek.” The overnight capacity of Deep Creek was 60 persons. Reservations no more than one week in advance must be made in person at the office of bursar Gerard Banks, where a list was maintained. In order to receive overnight accommodations at Deep Creek a student had to present to the Stevensons a reservation receipt issued by the bursar’s office. Students could invite up to two non-student guests, and student organizations could use Deep Creek. But “during the ski season, overnight accommodations by a single organization shall be limited to two-thirds of the capacity of the area, or 40 people, on Saturday nights.” These operational rules anticipated heavy student demand for use of the Deep Creek facilities, although the rules were relaxed in later years when demand declined.

The story of Deep Creek is also the story of a student group called the Chinook Club,
which was created by ASCPS in September 1948 to oversee management of Deep Creek. ASCPS took pains to make it clear that Deep Creek belonged to all students, not just to Chinook members. But the degree to which Deep Creek succeeded and the degree to which the Chinook Club functioned well paralleled each other very closely over the period between 1948 and 1956. In the early years, Chinook's members were heavily committed to the success of Deep Creek Lodge. Chuck Howe became student recreation manager, and Professor Sprenger was recreation advisor. Together, these two had primary responsibility for operations at Deep Creek Lodge. To drum up interest among the student body, the Chinook Club held an open house at Deep Creek each fall semester through 1955. The first open house was on Sunday, Oct. 31, 1948. Transportation from campus was provided, departing at 9 a.m. and returning at 6 p.m. Despite rain that day, some 100 students attended.

From the beginning, much of the work of maintaining the Deep Creek buildings fell to students. Some work was performed by the Stevensons and later by their successors, Mr. and Mrs. Wilkins. The buildings were located in deep woods beneath tall trees in a damp climate, and they were heated by wood stoves. Cajoling student volunteers to chop firewood was an ongoing campaign of the Chinook Club. Even though much firewood was split during the summer of 1948, Deep Creek users ran out of firewood before winter's end that year and had eventually to saw and chop outside in the cold.

Heavy snow fell throughout the winter of 1948–1949. Although the Forest Service had logged an area adjacent to Deep Creek Lodge that could be used for skiing, the elevation was only 2,700 feet, too low for early or reliable snowfall. Instead, the ski team practiced and held meets at Cayuse Pass (elevation 4,800 feet), some 10 miles east of Deep Creek Lodge. There, ski team members sought to install a rope tow. Bob Johnson, aide to Mount Rainier National Park ranger Pat Patterson, had responsibility for the Cayuse-Tipsoo area in the northeast corner of the park. Johnson was a veteran of the Army's 10th Mountain Division, which served in Italy, and was an exceptionally accomplished skier. Sympathetic to the wishes of CPS skiers, Johnson gave them permission to install a rope tow inside the park boundary, near Tipsoo Lake. Wrote Chuck Howe years later, "Johnson gave CPS
verbal permission to build a tow at Cayuse, simple as that! No paperwork or long wait for a request to go through government channels." The ski team was prohibited from cutting trees and had to remove the tow equipment from the park at the end of each ski season. The tow was powered by a war surplus Allis-Chalmers engine that President Thompson helped to acquire for the college.

This facility, in combination with overnight accommodations at Deep Creek Lodge, gave the ski team the resources it was looking for. Skiing was just beginning its upward climb in popularity, and the College of Puget Sound became a leader in the Pacific Northwest in generating interest. Each February, Professor Sprenger took the CPS ski team to Banff, Alberta, Canada, to participate in international competition. Two months after the 1950 competition, skiers assembled at Deep Creek Lodge to view a film made at the Banff event. They also viewed a film about the Corral Pass ski area proposed for development adjacent to Deep Creek Lodge, with a chairlift going some 3,000 feet higher up the mountain. This was an exciting possibility indeed.

In the spring semester of 1949, the college's physical education department began offering beginner, intermediate, and advanced ski instruction courses, for credit. The college was able to hire as ski instructors Martin Fopp and Shirley McDonald Fopp '41. Martin Fopp was a Swiss ski team racer who emigrated to the U.S. in 1940. He won the U.S. Downhill Championship in 1942, and Shirley won the '42 Women's Combined. They had taught at Sugar Bowl, Calif., Big Bromley, Vt., and Jackson Hole, Wyo. According to Howe, their "hiring created great attention in the Northwest ski world." Most instruction took place at Cayuse Pass, although some instruction occurred at Deep Creek Lodge after a rope tow became operational there in January 1952. The Fopps gave ski instruction each weekend for 15 weeks, and students had to attend 10 of the 15 sessions to pass the course. The Fopps offered the ski course through 1956.

The Trail acknowledged in a December 1948 editorial the contribution of Professor Sprenger to the reinvigorated outdoor recreation program: "Hats off to Dr. Sprenger; The new ski school to be established here is the direct result of his untiring work.... Dr. Sprenger has devoted much time to the development of Deep Creek, and the whole recreation program. ... The administration is backing Dr. Sprenger's plan. Here is the chance for students to get excellent ski instruction and also get credit for it."

One student who took the ski class, Nahad Askari, broke his foot and injured his knee during the March 20, 1948, class. After being driven to Tacoma General Hospital and subsequently released with his foot in a cast, Mr. Askari declared, "The first thing I can do I shall go skiing again." Mr. Askari was a CPS student from Iraq.

Each February for several years the Chinook Club sponsored a winter carnival. The first of these, called "Bahnfrei," occurred the weekend of Feb. 12-13, 1949. Six students vied for the title of Snow Queen: Rae Jenné Neele, Lois Leland '51, Jean Gudmundson '50, Dorothy Schweiner 'B.A.'46, B.E.'49, Delores Breum '51, and Lorayne Willoughby '64. Only men were allowed to vote. They elected Jean Gudmundson, who was identified as "an oddity among ski queens, one who can ski." Each year as part of the carnival, an intramural giant slalom race was held at Cayuse Pass. In 1949 it was won by the Kappa Sigma fraternity men and by independent (non-Greek) women.

The Chinook Club's 1950 winter carnival began on February 22, George Washington's birthday, a Wednesday holiday on which no classes were held. At the Cayuse ski area Gloria Christiansen was crowned Snow Queen. Chris Ostrom '53 broke her ankle during the races. Professor Sprenger presented awards to race winners at Friday night's winter carnival dance in Kittredge Hall, then the student center on campus. The next day, Saturday, a snow sculpting contest was held at Deep Creek Lodge, won by a sculpture of Donald Duck. That evening students square-danced in the lodge. The weekend ended on Sunday with a pancake-eating contest.

The Chinook Club's February 1951 Winter Ski Festival featured a Ski King, rather than a Snow Queen. Ski King Bill Goetting '54 served with an all-male court. After the February 25 races at Cayuse Pass, won by Sigma Chi, the campus bus took skiers back to Deep Creek Lodge, where they "warmed themselves and had free pie and coffee."

Aside from the winter carnivals, Deep Creek Lodge was in those early years the location of choice for the activities of many student and non-student groups. For example, a ski party was held at Deep Creek Lodge the weekend of Feb. 26-27, 1949, for independent students. Activities included "skiing, snow fights, eating, and dancing." Typical of non-student use was the December 1949 Pacific Northwest Ski Association instructors' certification program, relocated from Stevens Pass for lack of snow there.

Although events like these were successful, Deep Creek Lodge never did become a financially self-sustaining operation. After the big wave of war veterans graduated, student use of the facility declined. The arduous annual tasks of maintaining the cabins and chopping firewood appealed to students less and less. At the Feb. 23, 1956, meeting of ASCPS's central board, Professor Sprenger laid out the stark realities. Deep Creek revenues were about $1,000 per year, but expenses ran about $2,000. Use of Deep Creek Lodge was increasingly being made by outside groups, not by students.

Said Sprenger, "When ASCPS purchased Deep Creek eight years ago, the lodge was well used. Since that time, however, student interests have turned elsewhere. The number of CPS students per weekend using Deep Creek has dwindled to one or two." Although outside groups booked the lodge almost every weekend, the rates that could be charged for the primitive facilities did not cover costs. Professor Sprenger advised ASCPS that students should either use Deep Creek or dispose of it. Student leaders, after appointing a committee to review the situation, decided to sell the facility. The process of finding a buyer who could meet Forest Service lease requirements began, and the sale of Deep Creek Lodge was final in 1957. The college received $6,500, the same amount it had paid in 1948.

In September 1956 The Trail wrote, in an editorial titled "Farewell to Deep Creek," that Deep Creek was "a noble experiment" that had worked in the immediate postwar years, but now, with mainly non-student users, was operating as a money-losing "hotel as a public relations gesture for the college." Concluded The Trail, "...it is sad to watch the end of a possibility-laden project like Deep Creek." In
March 1957 The Trail wrote that "in selling Deep Creek, the ASCPS removed a millstone from its collective neck."

Retired sociology professor and associate academic dean Frank Peterson '50 has memories of Deep Creek Lodge. "It was very popular with the students who wanted to ski for the weekend. The lodge and log cabins, located among the fir trees, were quite well constructed but were pretty primitive. Although it was a quaint place, maintenance was a real problem. It needed care that the students could not provide and, after the 'newness' wore off, use declined markedly. Decay, dampness, and vandalism were continual problems. It was a beautiful setting, but the distance from campus and the costs were too great."

In 1980 former President R. Franklin Thompson reminisced about Deep Creek. He wrote, "On several occasions Lucille and I went up for the day, watched [the students] ski, and always had a potluck dinner in the evening. I shall never forget the fireplace in the [lodge] smoked and you not only had picnic food but you also had barbecued food."

Sally Sprenger is the middle child (of three) of Professor Robert and Mae Sprenger. Serving currently as international student coordinator in Puget Sound’s Office of International Programs, Sally remembers Deep Creek vividly, saying, "I grew up there. My parents liked to say that I learned to ski before I learned to walk." The Sprengers visited Deep Creek year-round. In the summer the Sprengers stayed for longer periods, hiking and picking huckleberries. Some years they celebrated Thanksgiving at Deep Creek. After Deep Creek was sold, Sally and her family cried every time they drove by. "It was so cool to be a faculty kid and to be able to go there."

The vast ski facility planned for Corral Pass never materialized, but Crystal Mountain did, opening on Dec. 1, 1962. The College of Puget Sound’s Deep Creek Lodge is today’s Alta Crystal Resort. Outside of Crystal Mountain’s own facilities, Alta Crystal provides the only overnight accommodations in the area. Today the university occasionally uses Alta Crystal Resort for group meetings and retreats.

The author is grateful to Chuck Howe B.A.'50, B.E.'51 for sharing his collection of Deep Creek Lodge photographs and documents. These and his personal recollections made this story possible. At age 84, Mr. Howe still skis.

Recent events

PHOENIX At the Tempe Center for the Arts on Nov. 12 (the first-ever Puget Sound parent/alumni event in Phoenix), about 40 Loggers came to hear President Thomas.

OLYMPIA At the Heritage Room, Dec. 3 (first time Puget Sound has hosted an event in Olympia in several years), about 45 alumni and parents were there to hear President Thomas and Professor Nancy Bristow, including (above) Charles Roe '53, P'79, Marilyn Roe P'79, Alexis Younglove Erickson B.A.'99, M.A.T.'00, and Justin Erickson '97.
SAN FRANCISCO Wine tasting and lunch at Retzlaff Winery, Oct. 18: In attendance were (in no particular order) Ernst Bauer, Leslie Schriver Bauer '84, Brett Ellers, Ruby Ellers, Kathleen Farber '73, Michael Fassler '89, Deborah Flaherty '69, Leonard Flaherty, Michelle Gutierrez '86, Karl Lichtenberger, Kate Lichtenberger, Mark Mitchell '96, Trina Mitchell, Shannon Murphy, Rebecca Page '94, Richard Rosthal, Susan Snyder Rosthal '68, Amanda Kulesz Sanders '99, and Kris Sanders.

Thinking Loggerly, having fun locally

What happens when you turn 11 regional alumni clubs loose to plan excursions in their home cities? Trips to the theater, museum tours, wine tastings, sports outings, happy hours, and potluck barbecues, that's what.

Last year, Alumni Council regional volunteers created events that reconnected more than 600 alumni in cities across the country. This year plans are already underway for a baseball game in Seattle, a wine tasting event in Portland, a networking night in Washington, D.C., and community service events and movie nights in other cities.

Sound like fun? Have your own ideas about what events would work well in your area? Contact the alumni regional club chair(s) in your city and let them know you want to help. They are:

Alumni and parents calendar

Regional events

MARCH 16
Puget Sound in Portland
Lawrence Gallery, 6:30 p.m.
Poetry reading: "Just Enough Poetry" Professor Hans Ostrom with selections from his book The Coast Starlight

MAY 6
Puget Sound Business Breakfast
Bell Harbor International Conference Center, Seattle, 7:30 a.m.
Join alumni business leaders as they share tactics and successes with other members of the business community.

On-campus events

MAY 14-16
Commencement Weekend
Families, friends, and members of the campus community are eager to celebrate this important milestone for the Class of 2010.

JUNE 4-6
Summer Reunion Weekend and Alumni College
All alumni and their families are invited to campus for Summer Reunion Weekend and Alumni College! Whether you're celebrating your 5th reunion, your 50th, or somewhere in between, or just want an excuse to come back home to Puget Sound, don't miss:
• Staying in the dorms (If you dare!)
• Reminiscing with friends at reunion events for classes ending in 0 and 5
• Reconnecting at the all-Greek affinity group gathering
• Heading back to the classroom with your favorite Puget Sound faculty

To find out more about alumni and parent events, go to www.pugetsound.edu/alumnievents.xml, or call the alumni and parent relations office at 253-879-3245 or 800-339-3312. To learn more about regional alumni club events, visit www.alumniconnections.com/loggemet/loggerpages.

AWARD WINNING PHOTO  Laura Haycock Schoeggl '00, who, with husband Scott Schoeggl '99, is a partner in Wallflower Photography, won an Accolade of Excellence for this picture from Wedding and Portrait Photographers International in 2008. For more on the Schoeggl's and their photography business, turn the page.
Ah, the party wallflower. Quiet. Invisible. The opposite of extrovert. But, say Laura and Scott Schoeggl, if you’re a wedding photographer that’s a good thing. So good, in fact, that when the couple started their business in 2002 they named it Wallflower Photography.

Laura and Scott first began working together while they were Puget Sound students: he as editor-in-chief of The Trail during his junior and senior years, she as head of various Trail editorial departments, and, as a senior, managing editor.

“The story of our partnership began in a basement,” says Scott, remembering The Trail’s former headquarters in a windowless box beneath Wheelock Student Center. Mired in the challenges of weekly deadlines, Scott and Laura discovered they not only worked well together under pressure, they were falling in love. By the time they married in 2002, Scott had gained the reputation of “the guy who was always taking pictures” and had photographed weddings for several friends. After watching their own wedding photographer at work, the couple realized they were already providing better and more inspired photos than the 20-year pro.

They built their business on a team approach. Two photographers, one male and one female, could cover both the bride and groom preparations simultaneously, find interesting perspectives during the ceremony and reception, and bring added creativity to the portrait session.

Although Scott occasionally shoots weddings solo when Laura isn’t available, they both value the diverse images that come as a result of individual strengths: Laura is a natural at catching expressions and emotions, while Scott favors landscape-type photography and wide angles. Back at the studio (in a home they renovated that’s on the Historic Register in Tacoma’s Stadium District), Laura handles customer relations and designs high-end coffee-table books for clients, and Scott does most of the photo processing.

After only a year in business they made the switch to digital photography, which made their skills in front of a computer monitor nearly as important as what they do behind the camera. “When the wedding’s over, our work is just beginning,” says Laura. “We go through a time-intensive process of editing our images and then applying corrections and enhancements so they print better than film-based images ever did.”

Demand for their work has grown quickly. Both left their full-time jobs—Laura in public relations, Scott in market research and online learning—and now the Schoegglis are taking a boutique approach, limiting their shooting to just 20 weddings a year.

“By concentrating on unposed, in-the-moment candid, augmented by artistic portraits reminiscent of fashion photography,” Laura says, “many clients hardly notice we’re there. A few even expressed concern that we got the shots we needed and were later relieved to see that we did. Those are my favorite kudos because they really underscore what we’re all about.”

For babies and pregnant moms, the couple recently launched a portrait studio they call Bump & Bambino. Their approach for the new venture is as creative as its name; the photographers dangle newborns (securely!) from tree limbs or nestle them in blown-glass bowls, in addition to more traditional poses. Future plans include tackling the high school senior and pet photography markets.

— Heather Larson

1961 Tom Barnard B.A.'61, P'90 was named Cleveland Best Lawyers Labor and Employment Lawyer of the Year for 2010. The designation is made through a peer-review survey process. Tom has worked for the U.S. Department of Labor and is a frequent national speaker on labor and employment issues. He also serves as adjunct faculty for Case Western Reserve University School of Law in Cleveland, where he is employed with Ogletree Deakins law firm.

1965 George "Marshell" Iviereired in 2000 after 35 years working for the Department of Defense as a medical scientist at Madigan Army Medical Center in Tacoma. He then worked as a volunteer firefighter and EMT for Anderson Island Fire-Rescue for six years. Now in his second retirement, he and wife Sue are back in Lakewood, Wash. They have been married for 30 years and have a son, Shawn, 26, who is a graphic designer in Las Vegas. Marshall would like to hear from members of the Sigma Chi classes of 1960-65. You can contact him at marshell61@comcast.net.

1968 Randy Melquist was elected president of the South Puget Sound Chapter of the National Association of Insurance and Financial Advisors. He also is the director of the Society of Financial Service Professionals.

Thomas Sadler B.A. '68, P'98 was named one of the Top 100 Most Influential People in Accounting in October 2009 by Accounting Today magazine. He has been in the accounting profession for more than 40 years and served as the 2008-09 chair of the National Association of State Boards of Accountancy. Among previously held positions, Thomas is past chair of the Washington State Board of Accountancy and currently serves as a strategic advisor to the board.

1969 Maria Benchoff sends this update: "When I graduated from UPS, my husband was still in active duty with the USAF. We were transferred to Sacramento, where I got my M.A. in Spanish from California State University, Sacramento, then Sacramento State College. We were transferred to Italy, returned to the U.S. in 1972, to March Air Force Base in Riverside, Calif., and I finished my Ph.D. in Spanish literature at UC, Riverside. I taught AP Spanish classes for many years. My husband and I are now retired, spending our time between Riverside and Pismo Beach. We have two daughters, both teachers, and three grandsons."

George Obizor, Nigerian ambassador to the United States from 2004 to 2007, has a new book titled Nigeria and the World, Managing the Politics of Diplomatic Ambivalence Among Nations, which consists primarily of the speeches George made while he was ambassador to the U.S.

1970 Sherry Miller has been a realtor in Bellingham, Wash., since 1999. Find out more at www.sherrym.net.

1971 James Rook writes: "As of March 1, I retired from Caterpillar after 36 years. At that point in time, my wife and I had been living in Singapore for four years. We moved to Rio Rancho, N.M., where we have a house and dealt with the fun of unpacking, buying new cars, etc."

35th REUNION JUNE 4-6, 2010

Tom James joined the Leavitt Insurance Agency in San Diego as its new president in November. He has more than 30 years of insurance brokerage and agency management experience. Tom's areas of specialization include construction, real estate development, property management, nonprofits, and production and event services.

Roosevelt Mercer Jr. was recognized by the Cambridge Who's Who Registry for demonstrating dedication, leadership, and excellence in the aerospace industry. As a retired two-star major general with more than 30 years in the U.S. Air Force, Roosevelt's final assignment was as director, plans and policy. He currently serves as vice president and director of intelligence, surveillance, and reconnaissance at ITT Corporation, based in Rochester, N.Y.

Ross Shafer emceed an event for Sage Software Inc. customers at the company's annual Sage Summit, held Nov. 9 at the Georgia World Congress Center in Atlanta. His Seattle-based television show, Almost Live, won 36 Emmy awards. Returning to his business roots, he has produced 14 human-resource training films on customer service, motivation, leadership, and peer pressure. Ross also has authored four business books, the most recent titled Are You Relevant?: 12 Reasons Smart Organizations Thrive in Any Economy.

Edward Chow M.P.A. '76 was named secretary of the Department of Veterans Affairs on Sept. 1, 2009. He most recently served as president of Maryland's Council for the Vietnam Veterans of America, overseeing 10 state chapters and serving as a representative to state and federal elected officials since 2006. Earlier in his career he was the city administrator in Kent, Wash., and served as director of emergency services for the state of Washington. Edward served in the Army Reserve from 1956 to 1960 and as a lieutenant and captain in the Army during the Vietnam War. He received a Bronze Star, the Legion of Honor Award from the Chapel of Four Chaplains, and the President's Executive Award from the Washington State Council of Vietnam Veterans of America.

Jim Pryde B.A. '76, P'12 took over as Gladstone, Ore., police chief on May 1, 2009. He served more than 31 years with the Olympia Police Department in Washington, retiring as a lieutenant. Jim also attended the FBI National Academy and was named a fellow to the FBI leadership program.

40th REUNION JUNE 4-6, 2010

1970 Sherry Miller has been a realtor in Bellingham, Wash., since 1999. Find out more at www.sherrym.net.

1971 James Rook writes: "As of March 1, I retired from Caterpillar after 36 years. At that point in time, my wife and I had been living in Singapore for four years. We moved to Rio Rancho, N.M., where we have a house and dealt with the fun of unpacking, buying new cars, etc."

About classmates

The Classmates editor is Cathy Tollefson '83. You can call her at 253-879-2762 or e-mail ctollefson@pugetsound.edu.

Where do Classmates entries come from?

About half come directly from you, either in letters or in e-mail updates. Some reach us when alumni volunteer for the ASK Network and grant permission for the information they provide to be published in Arches. The rest are compiled from a variety of public sources such as newspaper and magazine clippings, and press releases sent to us by employers when, for example, a Puget Sound grad at the company gets a new job. We publish Classmates information both in the print edition of Arches and on the Web in the online version. It is our policy not to publish pregnancy or release sex information both in the print edition of Arches and on the Web in the online version.

Publication deadlines

Aug. 15 for the autumn issue, Nov. 15 for winter, Feb. 15 for spring, May 15 for summer

To send Classmates entries or to change your address

Electronically: www2.pugetsound.edu/forms/update.shtml or e-mail Classmates Editor Cathy Tollefson '83 at arches@pugetsound.edu.

Post: Arches, University of Puget Sound, Office of Communications, 1500 N. Warner St., Tacoma WA 98416-1041.

When submitting a change of address, please include your old address.
1977
Randy Allment
B.A. '77, J.D. '80
co-chaired a program held at the School of Law, Tsinghua University in Beijing, on Sept. 10, 2009, titled "Legal Challenges to Chinese Companies Doing Business in the United States." The program addressed the U.S. legal system and its applications to Chinese businesses operating in the U.S., and the consequences to those businesses that violate U.S. business and consumer protection laws. As a volunteer lawyer for the American Bar Association's Tort Trial and Insurance Practice Section, Randy prepared his presentation and made the trip to China at his own expense.

Bruce Grant
M.P.A. '77
was appointed director of the Office of Drug Control by Florida Gov. Charlie Crist on Oct. 23, 2009. Bruce served as the assistant secretary for the Department of Corrections from 2007 to 2009, and from 2001 to 2005 he served in the governor's Office of Drug Control as the chief of counterdrug law enforcement and then as chief of staff. In December 2005 he resigned his position in the governor's office and volunteered to return to active duty. From 2005 to 2006 Bruce served as a colonel with the 101st Airborne Division as the deputy team leader of the Provincial Reconstruction Team in Mosul, Iraq.

1980
Deanna Watson Oppenheimer
B.A. '80, P '11, CEO of UK retail banking for Barclays Bank, was named vice chair of global retail banking for Barclays in November 2009. Deanna chairs the Puget Sound board of trustees.

1981
Ann Archer
M.S. '81
was named medical director of Integris Comprehensive Breast Center of Oklahoma City in February 2009. She is a nationally recognized expert in early detection and prevention of breast cancer, with more than 20 years of experience. Previously Ann led the team at the University of Oklahoma Breast Institute beginning in 2004. She co-founded the first mammography center in the country of Armenia more than a decade ago. Ann earned her medical degree from the University of North Carolina at Chapel Hill, completing her residency at Georgetown University Hospital in Washington, D.C., with an emphasis on diagnostic radiology and body imaging.

1982
Michael Bair
M.B.A. '82
was included as a notable executive in an Oct. 29, 2009, article about The Boeing Company in South Carolina's The Post and Courier. He is the vice president of business strategy and marketing for Boeing Commercial Airplanes and previously was the vice president and general manager for the 787 program.

Brad Thayer, along with wife Betty and daughter Riley, appeared on the new reality TV show Platinum Babies on Nov. 20, 2009, on the Women's Entertainment (WE) television network. The series followed the stories of six couples who "spared no expense" on the journey to becoming parents. See Betsy and Brad's episode at www.wetv.com/platinum-babies/episodes.

Clark Yerrington was profiled in an arts roundup in the Alaska Dispatch for his "Wild Abandon" photography exhibit that ran through Dec. 4 in Anchorage. The photos, taken over the summer, look at how natural vegetation reigns abandoned structures. Clark is an architectural designer for Bezek Durst Seiser Inc., with more than 23 years of experience.

1983
John Andrews
M.B.A. '83
joined Varsity Media Group Inc. as president and CEO in November 2009. He has spent more than 25 years in the information technology industry, including as head of publicly traded eMedSoft.com Inc. and as chief information officer for CSX Corporation, a Fortune 500 company.

Houston Dougherty, vice president for student affairs at Grinnell College in Iowa, was quoted in USA Today on whether social networks make students more narcissistic. He disagrees, saying that today's students are altruistic and care about helping others, and that social networking is "a celebration of individuality."

Charles Ferer
joined Sungevity as chief financial officer in September 2009. Most recently he served as CFO for SolarCity, the largest solar installer in the U.S., where he helped raise more than $60 million in tax equity and launched a successful solar leasing program. Charles has 20 years of experience, including with Gap Inc. and PepsiCo Inc.

Jim Thomassen was hired as a small-business relationship manager for Home Federal Bank of Idaho. Jim's 25 years of banking experience include more than 15 years with customers in the Treasure Valley area in Idaho.

1984
The Rev. Patrick
McElroy B.A. '90,
M.A.T. '92
was installed as the senior pastor at the First Presbyterian Church of Wenatchee, Wash., on Aug. 23, 2009. He earned his Master of Divinity degree from Trinity Evangelical Divinity School in Deerfield, Ill., and is studying for a Doctor of Ministry degree.

Jennifer Simpson Robertson
was elected to serve on the Bellevue City Council in Bellevue, Wash., in November 2009. She will serve the remaining two years of a vacant seat. Jennifer earned her J.D. from Willamette University College of Law in 1993.

1985
Bryan Ohno
directed The Window Art Project, MadArt's kick-off event that involved more than 20 works of art in store windows in Seattle's Madison Park area from Sept. 12 through Oct. 4, 2009. After years of owning his own gallery in Pioneer Square, Bryan currently serves as a consultant and develops new exhibition concepts that embrace art, architecture, and science, particularly in public spaces. Find out more at www.madartseattle.com.

1989
Jeff Parkhurst
was appointed principal in the San Francisco office of Edgewood Partners Insurance Center, a retail property, casualty, and employee benefits insurance brokerage. He has specialized in construction underwriting, bonding, and client production and management in his 20 years in the industry.

Following a national executive search process, Maiko Winkler-Chin was selected as the new executive director of Seattle Chinatown International District Preservation and Development Authority (SCIDpda) in September 2009. She was previously the director of housing and facilities for SCIDpda. Maiko earned her M.P.A. from the University of Washington and serves on the boards for the Housing Development Consortium and the Affordable Housing Management Association of Washington.

1990
The Rev. Patrick
McElroy B.A. '90,
M.A.T. '92
was installed as the senior pastor at the First Presbyterian Church of Wenatchee, Wash., on Aug. 23, 2009. He earned his Master of Divinity degree from Trinity Evangelical Divinity School in Deerfield, Ill., and is studying for a Doctor of Ministry degree.

Jennifer Simpson Robertson
was elected to serve on the Bellevue City Council in Bellevue, Wash., in November 2009. She will serve the remaining two years of a vacant seat. Jennifer earned her J.D. from Willamette University College of Law in 1993.

1993
Nabil Ayers and Michaela Brangan were married on Aug. 16, 2009, at The Corson Building in Seattle. The couple's big day was featured in Seattle Metropolitan Bride and Groom in its Real Weddings section. The online gallery is at www.seattlemetbrideandgroom.com/2009/07/20/brangan-ayers-wedding. Nabil continues as co-owner of Sonic Boom Records and owner of the Control Group record label. The two are currently living in Brooklyn, N.Y., where Michaela is a law student.

Douglas Heuel and Staci Strong were married on Aug. 8, 2009, in San Diego, and honeymooned on the island of Kauai. The couple make their home in Dallas, where they both are employed as attorneys. Douglas earned his J.D. from Southern Methodist University Dedman School of Law.

Brian Jolin returned from the Republic of Benin, West Africa, where he served in the Peace Corps for the past two years. His plans include joining fellow Sigma Chi brothers Zach Goldberg and Brendan Riley as a financial advisor for UBS Financial Services, where, he says, he will be putting his Business Leadership Program education to good use.

John Richardson is an associate professor of sculpture at Wayne State University in Detroit. His one-man exhibit, titled "Balance," was on display in the Pittsburg State University gallery for the month of November 2009. John earned his master's in fine art from the University of Wisconsin-Madison and first began working in metal. He later moved to wood sculpture and now incorporates rubber, silicone, and even silk in his work. John's sculptures are held in public and private collections, including the Michigan Legacy Art Park; Xiadu Park, Yanqing, China; the Open Air Museum of Steel Sculpture, Coalbrookdale, England; and the Lumsden School, Lumsden, Scotland.
Kristen Bernes Rich '85

A neat solution

Kristen Rich has poop on her mind. Dog poop, that is. And it’s not so much the actual poop she’s focused on as what to do with it once it happens.

Enter Go and Stow, a product Kristen developed for the pet retail industry. It’s a rip-stop nylon pouch that attaches to the leash and stays neatly folded until needed. To use, just unroll the pouch and place your dog’s poop bag inside for discreet transport. The poop is contained—but out of sight—until you can dispose of it.

“It’s a good concept and people are really starting to purchase them,” says Marney McGovern, inventory manager for Mud Bay, the Olympia-based chain of pet stores that signed on as Rich’s first account. “It’s the kind of product that makes you ask, ‘Why didn’t I think of that?’”

The idea for Go and Stow came from Kristen’s own experience—and frustration—as a dog owner.

“Whenever we went out, I found myself carrying this bag around looking for a garbage can, and I certainly wasn’t the only one. I started noticing other people who tied baggies of poop to their leash or who were carrying them down by their sides,” she says. “It wasn’t pretty.”

With an entrepreneurial spirit she inherited from her father, Kristen called a friend with a sewing machine.

“She was able to sew up a prototype of the product I envisioned,” she says. “We tested it. It worked—and that’s when I got antsy. I started searching for just the right fabric and just the right fastening systems. Before long, I began to think this could actually be something.”

With counsel and encouragement from pal Tom Sarris ’83, director of global communications at Playfish and a volunteer business advisor at SCORE, Kristen set out to make her dream a reality. She developed a business plan (Tom came up with the idea), had a logo designed, had labels made, obtained a provisional patent, set up invoicing, shipping and packaging systems. Determined to make a high-quality product that was U.S.-made, she connected with a manufacturer in Tukwila, Wash. And, when it was all done, Go and Stow hit store shelves in September 2009.

“It’s exciting and all-consuming,” says Kristen who, with the help of her family, is handling distribution and shipping from her garage in Bellevue.

“It seems like this is moving so fast, going from concept to market in just over a year, but at the same time, I worry I’m not growing fast enough,” she says. “I have ideas about catalogs we should be in, and stores I need to meet with, and information I need to get to pet-friendly hotels, and festivals or expos I should attend, and magazines I need to pitch articles to—but I also understand the value of slow, steady growth.

“I want to be certain I’ve taken care of all the proper housekeeping tasks before I start talking to the REIs and PetSmarts of the world,” she says. “The worst thing I could do right now is create a business that’s so big I can’t handle it.”

She understands that the product, which comes in three sizes and retails for $11.25 to $12.95, won’t hold an appeal for all pet owners. Two niches she is targeting are city dwellers and people who run with their dogs.

While the pet biz is new to Kristen, she’s a veteran of the business world. After graduating from Puget Sound with a degree in sociology, she worked in the medical sales industry. In 1993 she went back to school to fulfill her dream of becoming a pastry chef. Later, she decided to specialize in chocolate so she got more training and opened The Chocolate Studio, through which she still teaches classes and sells chocolates seasonally.

“No, I’m the first to admit it’s not a logical jump from medical sales to chocolate to poop,” adds Kristen. “But my previous business experiences all helped prepare me for what I’m doing now.

“I’ve always been an idea person, and this new path is allowing me to move ideas forward in a way that’s exciting and rewarding and frustrating and challenging—all at once. It’s not easy, but it’s fun. Pet people are really, really fun.” — Mary Boone

Find more on Go and Stow at www.goandstow.com.
1998

Olga Mendoza-Schrock won the 2009 Mentorship Service Award presented by the U.S. Department of Defense and the National Organization for Mexican American Rights. She was recognized for exceptional service as a research mathematician employed at the Air Force research laboratory. The award is given to only five civilians and five military employees from the DoD, including all branches of the military. Olga earned a master's in mathematics from the University of Kentucky in 2004 and is now working on an advanced degree in computer science at Wright State University.

1999

Ryan Spence was noted in a Sept. 3 article in Tacoma's News Tribune about Vertical World, the state's largest climbing-gym chain. Ryan is Vertical World's wall-building specialist and was credited as the reason the company moved its manufacturing facility to Tacoma. Vertical World also just opened a bouldering gym (designed by Ryan) at the site near the Tacoma Dome. Check it out at www.verticalworld.com.

10th REUNION
JUNE 26, 2010

Tim Allbee
M.A.T.'00 served as interim head football coach for Olympic High School in Bremerton, Wash., this past fall. He also teaches history there. Tim was a first-team All-Frontier League lineman in high school in Spokane, then was recognized for exceptional service as a research mathematician employed at the Air Force research laboratory. The award is given to only five civilians and five military employees from the DoD, including all branches of the military. Olga earned a master's in mathematics from the University of Kentucky in 2004 and is now working on an advanced degree in computer science at Wright State University.

2000

Brad Johnson was featured in a gamesindustry.biz press release as one of the game developers of Cement Tower, a physics-based puzzle game in which you stack blocks together to construct a tower to the stars with one key twist—you can cement your tower in place if it becomes unstable and then continue to build on it. Cement Tower was noted as the first game developed using the Wild Pockets open platform. Brad is part of a team of independent developers that formed at the Wild Pockets Bay Area Game Jam that took place on the Microsoft Silicon Valley campus in April 2009. The team won first place at the event for creating the game Lava Ball. Find out more at www.cementtower.com.

Melissa Krick Koch sends this update: "I completed my Ph.D. in biology at the University of California, San Diego, in May 2009. This summer my husband [Ty Koch] and I relocated to the Boston area, where I am a postdoctoral research associate at Tufts University. Ty is working as a protein biochemist at a start-up biotech company, Parasol Therapeutics, in Cambridge."

Heather Lindley McClung is a co-owner of Schooner Exact Brewing Company, based in West Seattle. The brewery was showcased in a News Tribune article as one of 44 breweries at the inaugural Tacoma Craft Beer Festival (held Oct. 3, 2009), at which they walked away with the People's Choice award for best brewery! Find out where you can sample Schooner Exact's Three Grid IPA at www.schoonereexact.com.

Erin McGillivray was hired as the Peace Corps representa-tive at the University of Minnesota last fall. The university is among 10 Midwest colleges that have hired a campus-based recruiter. Erin spent two years after college as a Peace Corps volunteer working in Kenya as an HIV/AIDS educator.

2002

Kathryn Loes Sage and Damon Haer Sage are living in Prescott, Ariz., where they have opened a natural-medicine clinic called Sages' Healing Center. Kathryn graduated from the National College of Natural Medicine in Portland, Ore., in 2009, with a doctorate in naturopathic medicine, and Damon graduated from the Oregon College of Oriental Medicine with a Master of Acupuncture and Oriental Medicine degree (MACOM). You can find them at www.sageshealingcenter.com.

2003

Emerald Archer earned her Ph.D. in political science from the University of California, Santa Barbara, in June of 2009. She accepted an assistant professor position at Woodbury University in Burbank, Calif., teaching political science. Emerald is a new homeowner and resides in Pasadena.

Molly Campbell married Andrew Nelson on Sept. 7, 2007, in Boise, Idaho. She earned her M.A.T. from George Fox University Boise Center in June 2008. Molly is in her second year as a fifth-grade teacher for Meridian Elementary School in Meridian, Idaho.

Daniel Corral received his M.F.A. in composition from California Institute of the Arts in 2007, and has been working as a composer and teacher in Los Angeles. In February he will be participating in the Asia Pacific Performance Exchange artist residency in Ubud, Bali. Listen to his music and find out more about what Daniel is up to at www.spinalfrog.com.

Ineliz Soto spoke at the con-vocation service of Milligan College in Tennessee on Sept. 29, 2009, encouraging graduates to get involved in their communities and to pursue their dreams. She also spoke at a diversity forum later that day. Ineliz is a former AmeriCorps volunteer who works at Seattle Pacific University as a senior admission counselor and in multicultural outreach.

Morwari Zafar sends this update: "I've been working in Afghanistan on USAID-funded development programs for the last year and a half. Since I was born in Kabul and raised there until I was 8, it is a bizarre experience to come back! It is exhilarating to be in the midst of such change, and a witness to the evolution of a nation that will undoubtedly feature in global politics for decades to come." Morwari earned her master's in anthropology, with a concentration in international development, from George Washington University in 2007.

4th REUNION
JUNE 4–5, 2010

Alicia Case was awarded second place in the Nimrod International Journal's 2009 Pablo Neruda Prize for Poetry contest, which was judged by Marie Howe, author of What the Living Do. In addition to receiving the award at the journal's annual dinner on Oct. 23, 2009, she participated in a panel along with other winners, judges, and distinguished writers, and co-taught a poetry workshop with celebrated poet James Ragan. Alicia's prize-winning poetry appeared in Nimrod's fall 2009 issue. She is a graduate student in the M.F.A. program in creative writing at American University in Washington, D.C., and works as a content writer and Web administrator at the Carnegie Institution of Washington, Department of Terrestrial Magnetism.

Anna Owens was quoted in a CNN.com article about whether social class determines your online social network use. Recent research suggests that it does. Anna works for an affordable-housing nonprofit in San Francisco.

2004

Kara Christianson sent this news in September 2009: "I just moved to New York City to work as an associate director of recruitment for Uncommon Schools, a charter-school management organization. It is exciting to be on the East Coast after three years living in L.A. and teaching 6th grade with Teach For America. A great moment—I walked into one of the Uncommon Schools, Williamsburg Collegiate, to visit with the staff. It was Friday, and during the community meeting, classrooms were sharing their..."
class cheers. To my surprise, I suddenly heard chants of "Once a Logger, always a Logger" from a group of Brooklyn elementary students. It turned out their teacher is **Class of 2007** religion major **Alexandra Bronson**! We were quite excited to find each other so far from UPS.

**Patrick Garrett** and **Helen Smelko** were married on Sept. 12, 2009, in Kilworth Memorial Chapel. The ceremony was followed by a reception at Union Station in Tacoma where guests danced to Daryl and the Dippets. Pat is employed by Onvia.com, and Helen works for West Seattle Nursery.

**Ashley Lauth** is a member of Green Corps' Field School for Environmental Organizing, which trains college graduates to run environmental campaigns. They first learn to build a core group of activists and finish by convincing decision makers to pass laws, change policies, and create reforms to protect the environment. The one-year, paid position includes intensive classroom training and hands-on field experience running environmental and public-health campaigns. Ashley was in Phoenix as the state organizer for the national T1Sky campaign, working toward climate solutions. She writes: "In order to make a sustainable future a reality, we need to get a strong clean-energy bill passed." Campaign highlights include a 100-person rally for climate solutions in Washington D.C.

**Deede** by volunteers, and meeting Sen. McCain and asking him update: "Joshua [Andert] in Tacoma. She also served as an associate professor of neighbors of the university past 15 years. More at www.Greece, we got married on anthem at the 1963 joint UPS/ until her death in 1996. Survi- lege for student housing upon

**Environmental** graduet more than 200 with Teach For America. This El in Tacoma. Margaret was Margaret Martin '36 in 1941; son and his wife. The Days International Day of Climate more than 30 years. Margaret degree in bus iness from the chapel was named in honor
torial and blog pieces written Ellison Kuhne gregational Church in Seattle er a certified public accountant killed in a car accident in 1940. The one-year, paid position includes intensive classroom training and hands-on field experience running environmental and public-health campaigns. Ashley was in Phoenix as the state organizer for the national T1Sky campaign, working toward climate solutions. She writes: "In order to make a sustainable future a reality, we need to get a strong clean-energy bill passed." Campaign highlights include a 100-person rally for climate solutions in Washington D.C.

**Ellison Kuhne Andert** sends this update: "Joshua [Andert] and I are in our second year of teaching in New Orleans with Teach For America. This summer, after four weeks in Greece, we got married on July 11. The day of the wedding was wonderful—we were surrounded by our family and friends, and among them were Matthew Taylor, Caitlin Deede, Eric Schneider, and Matthew Loewen."

**Ian Brennen** was highlighted in a Yakima Herald-Republic article about preventing falls among the elderly. He worked in Yakima, Wash., this past year as the senior falls prevention coordinator for AmeriCorps VISTA and the state Retired Senior Volunteer Program.

**Joseph La Sac** and Kendall Bjelland '10 produced a documentary about local food in Tacoma, titled *Eating Locally in Pierce County*. Check out this well-made documentary on YouTube.

**Amy Polansky** joined GA Creative in Bellevue, Wash., as its emerging-media coordinator, in response to the agency's increasing use of social media as a marketing tool.

**Rachael Pullin** was described as "a talented and observant writer" by Northwest art critic Jen Graves, formerly of Tacoma's *News Tribune* and now writing for *The Stranger* in Seattle. Rachael worked as *The Stranger*'s visual-art intern and wrote about Seattle Art Museum's summer show titled "Target Practice."

**in memoriam**

**faculty**

**Margaret Myles**, professor emerita of music, passed away on Sept. 18, 2009. She was 96 years old. Margaret was born in Hamilton, Ontario, Canada. She served as professor of voice at Puget Sound for more than 30 years. Margaret was a soloist at Plymouth Congregational Church in Seattle and First Presbyterian Church in Tacoma. She also served as director of music at First Presbyterian and at Temple Beth El in Tacoma. Margaret was selected to sing the national anthem at the 1963 joint UPS/PLU convocation ceremony at which President John F. Kennedy spoke. She was also asked to sing for events at which Gen. Douglas MacArthur and Gen. Dwight D. Eisenhower were present. Margaret was a longtime member of the professional music fraternity Mu Phi Epsilon. She is survived by three nieces. You can read more about Prof. Myles in the "Good Teachers, Good Friends" feature in the summer 2004 Arches.

**Richard Robinson** was born in Yakima, Wash., in 1921 and died on Sept. 5, 2009, in Gig Harbor, Wash. He earned his bachelor's degree from the University of Washington, a master's from Harvard, and his Ph.D. in international management from MIT. Richard taught in the UPS School of Business and Public Administration for eight years, as a George F. Jewett Distinguished Professor. Previous to that he taught for 24 years at MIT's Sloan School of Management. During his time there, he created the second academic program in the country dealing with international business and wrote one of the first textbooks in the field. Prior to his teaching career, Richard was a foreign correspondent in the Middle East and worked in political intelligence in South Korea. He also studied Islamic law and Ottoman history. Richard's first wife preceded him in death in 1979. He leaves his second wife, Carol; three children; five grandchildren; one great-grandchild; six stepchildren; and four step-grandchildren.

**in memoriam**

**alumni**

**John Soha** '36 died on July 6, 2009, at age 95. Born in Belt, Mont., he earned a master's degree in business from the University of Michigan later a certified public accountant degree from CPS. He worked as an associate professor of accounting at the University of Oregon. John was married to Margaret Martin '36 in 1941; the couple remained together until her death in 1996. Survivors are two sons, two grandchildren, and a sister.

**Margret Goodman Hammond B.A. '40, P'78** died peacefully in her sleep on Sept. 17, 2009. Born in Seattle, she graduated from Sumner High School in 1936. Margaret earned her bachelor's degree from the University of Washington in 1942. She met her future husband, Charles Hammond '40, in a biology lab at Puget Sound. They were married for 65 years, until his death in 2008. Among Margret's favorite activities were boating, skiing, and spending time with family at their Tulalip Bay beach house or cabin at Stevens Pass. Son Whitney also preceded her in death. Survivors are two sons, including Curtis Hammond M.B.A. '78; one daughter; and seven grandchildren.

**Doris Day Sapp** '41 died at her home in Gardnerville, Nev., on Sept. 24, 2009. She was 90 years old. Born in Joplin, Mont., Doris grew up in Tacoma. After earning her degree in economics at Puget Sound, she married Allan N. Sapp in 1945. The two moved to San Francisco, later settling in San Diego, where they lived for more than 50 years. Doris was a founding member of the Philanthropic Educational Organization (P.E.O.), Chapter PT, and was an active member of her home community. She and her husband traveled extensively in retirement and enjoyed dining out in San Diego and the Carson Valley. Her husband of 64 years; their son, Allan D. Sapp '78, and his wife, P.J.; and two grand-children, Holden Sapp '10 and Hillary Sapp, survive Doris. A memorial service for Doris was held on Oct. 24 in the Gail Day Chapel on campus. The chapel was named in honor of Doris' sister after she was killed in a car accident in 1940. Doris and Gail's parents were neighbors of the university and longtime friends of then President R. Franklin Thompson and his wife. The Days donated their home to the college for student housing upon their passing.

**Robert Dodds** '43 passed away on Oct. 7, 2009, at 88 years of age. Born and raised in Tacoma, Bob graduated from Lincoln High School in
Dalles, Ore. Michael's hobbies passed through her career included surfing, backpacking, and developing business, later moving to the community where he lived, and the Oakbrook Golf and Country Club. An infant daughter preceded him in death. Bob's wife, Germaine; three daughters; six grandchildren; and six great-grandchildren survive him.

Suzanne Lidren Helgeson '43 passed away in October 2009, at the age of 88. She was born in Seattle and was married to Robert Helgeson for 49 years before his death in 1997. She was a longtime member of Immanuel Presbyterian Church in Tacoma and was a member of Delta Alpha Gamma sorority. One daughter, two sons, 10 grandchildren, and five great-grandchildren survive Suzanne.

Douglas Bowman '48 passed away on Sept. 24, 2009, just a month shy of his 84th birthday. Douglas was born in St. Louis, Mo., and his family moved to Naches, Wash., where his father was the town doctor. Douglas was an Eagle Scout. After receiving his degree from CPS, he taught school in Troy, Mont., before returning to earn his master's and doctoral degrees at the University of Washington. Douglas also met his future wife, Evelynne, while attending the UW. The two were married in 1955. In 1959 he began teaching at Northwestern University School of Dentistry as a professor of physiology. In 1964 he began his tenure at Loyola University School of Dentistry and taught there for 25 years, publishing dozens of research papers and retiring in 1988 as professor emeritus. Douglas served as deacon, elder, and treasurer of United Presbyterian Church in Peoria, Ill., and was active in Kiwanis International, twice being named Kiwanian of the Year. His wife of 54 years, two daughters, one son, and six grandchildren survive him.

Leon Clark B.A.'50, P'81 passed away on Nov. 11, 2009, at the age of 82. Born and raised in Tacoma, Leon studied for a year at Stockholm University after graduating from CPS and later received his master's degree from George Washington College. He served in the Merchant Marine Corps for two years and as a psychiatric social worker in the Army for two years. Leon had a passion for the outdoors, beginning as a youth attending YMCA Camp Seymour on the Key Peninsula. He continued as a counselor at the camp and later returned as camp director. This was the start of a 25-year career working for the YMCA in Tacoma; Klamath Falls, Ore.; Phoenix; and Helena, Mont. In retirement Leon pursued his interest in all things Norwegian and became a field representative for the Sons of Norway. He was always active in the community where he lived, volunteering at church and with Rotary and the Sons of Norway. Leon is remembered for his zest for life and eternal optimism by survivors who include wife Betsy Huhn Clark B.A.'51, P'81; three daughters, including Patty Clark '81 and her husband, Bernard Kravitz '81; one grandson; a sister; a brother; and many nieces and nephews.

John Byron Norton '50 died July 28, 2009, after battling esophageal cancer. He was 81. After CPS Byron earned his J.D. from the University of Michigan, and was a partner in the John F. Forbes accounting firm. He later earned a master's in law in taxation from the University of San Diego. Byron taught accounting at Central Washington University, Fresno State University, Saint Martin's University, and South Sound Community College. He also worked as an administrative law judge for Washington's Department of Revenue. Byron was a member of Rotary, the Elks, and the Shriners. A son and one daughter survive him.

Elaine Crawford '51 died on Aug. 23, 2009, at the age of 80. She was a social worker, employed with Washington's Department of Social and Health Services for more than 20 years. Elaine enjoyed gardening, walking, reading, and listening to classical music and opera. She was a longtime member of the Tacoma Civic Chorus.

Yoshikyo Kimura '52 passed away on Sept. 27, 2009. He was 85. Yosh was born in Seattle and grew up in Tacoma. He attended Stadium High School, although he graduated from high school in the Minidoka internment camp in Idaho. Yosh served in the U.S. Army during World War II, afterwards attending the College of Puget Sound, graduating with a degree in chemistry. He met his future wife, Fumiko Takahashi B.A.'54, M.A.'77, while attending CPS and the two were married in 1954. Yosh spent most of his career as an agricultural chemist and researcher at the Washington State University Research and Extension Center in Puyallup, Wash. He was recognized for his research on plant growth hormones. Yosh enjoyed fishing, skiing, and camping with his family. One son preceded him in death. Survivors are his wife of 55 years; two sons; daughter Jeanne, who works in the Collins Memorial Library on campus; and six grandchildren.

Ronald Poe '53 died on Sept. 12, 2009, at age 85. He grew up in Puyallup, Wash., and graduated from high school there in 1942. Ron served in the Navy for six years before earning a business degree from Puget Sound and later owning his own business. His spare time was spent fishing, hunting, and golfing. He is survived by his wife of 36 years, Patricia; four daughters; two sons; 11 grandchildren; and six great-grandchildren.

Rev. Eric Kullberg '54 died on March 2, 2009. He was 86 years old. Eric was a retired elder of the Greater New Jersey Annual Conference of the United Methodist Church. He served as pastor of churches in Barryville, Eldred, and Port Jervis, N.Y., and Boonton and Teaneck, N.J., retiring in 1975. One son survives Eric.

Geraldine Gordon Lammanno '55 died peacefully at home on Oct. 10, 2009, surrounded by family members and a longtime friend. She was 78 years old. Geraldine was born in Vancouver, B.C., and graduated from Stadium High School. She majored in music at Puget Sound and sang with the Adelphian Concert Choir. Geraldine was a pianist and soloist for Mason United Methodist Church in Tacoma. She was a social worker in child welfare living in San Francisco for six years and was a member of the Pike Place Market community in Seattle for more than 32 years. She loved opera, animals, and her garden. Geraldine is remembered for her beauty, spirit, and courage. Survivors include her husband, Joseph Lamanno; her brother, Robert M. Gordon; sister, Patricia Zumhoff; two nieces; and one nephew.

Earl Anderson '61 passed away peacefully on Oct. 28, 2009. He was 89 years old. Earl was born in South Dakota and raised in Inochelum, Wash. He served in the Army Air Corps during World War II and earned his degree from Puget Sound when he returned. During his career he worked for Standard Oil Company and B and F Grocery, and was self-employed in plumbing repair into his 80s. His wife of 44 years, Maria, and their three children survive Earl.

Judy Olin Grant '62 died of lung cancer on Oct. 20, 2009. She was age 68. Judy grew up in Lewiston, Idaho, and attended the University of Idaho before completing her degree in occupational therapy at Puget Sound. Her life's work was to help children with developmental challenges. Judy made considerable efforts throughout her career to improve child therapy. She enjoyed playing golf, listening to classical music, and riding her motorcycle. She was an active member in the League of Women Voters. Judy supported Brain Gym International, serving as board chair for several years. One son preceded her in death. Two children, one stepson, four grandchildren, and two step-grandchildren survive Judy.

Roger Brewington '64 passed away on Sept. 23, 2009, after battling cancer. He was 69 years old. Roger had a passion for mountains and climbed several peaks in the Cascades, Rockies, and Mexico. He made two treks in Nepal with Prof. Emeritus of Physics Bert Brown in the late '80s. In the 1960s Roger helped develop what is now the Explorer Search and Rescue program in Pierce County. An estimated 3,000 participants have completed the training program. He leaves his wife, Jacque; two daughters; seven grandchildren; and one great-granddaughter.

Michael Fritz '64 died on Sept. 28, 2009, just two months prior to his 67th birthday. Born and raised in Salem, Ore., he graduated from South Salem High School in 1960. Michael went on to what is now Oregon Health and Science University School of Medicine, earning his M.D. degree in 1967. He interned at Fresno County Hospital in California before joining the U.S. Air Force, where he was trained as a flight surgeon. Michael later completed his residency in anesthesiology at Harbor General at UCLA and pediatric anesthesia at Los Angeles Children's Hospital. Following a fellowship in pulmonary medicine in England, he joined the teaching staff at UCLA for several years before entering private practice at Long Beach Memorial Hospital. In 1991 he and his family moved to Hood River, Ore., where he briefly had a tax business, later moving to The Dalles, Ore. Michael's hobbies included surfing, backpacking, and scuba diving. He served as a scoutmaster when he lived in California. Michael had a lifelong interest in automobiles and was active in several car clubs. He also was an avid fly fisherman and hunter. Michael and his wife, Sandra Forrest Fritz '64, were ardent travel...
ers and visited countries on all seven continents. Survivors include his wife of 45 years, their three children, and three grandchildren.

Glendora Isaac Woodcock '67 passed away on Sept. 23, 2009. She was 84 years old. Born in Hastings, Neb., Glendora graduated from high school in Salem, Ore. She was a 40-year resident of Tacoma and Seaview, Wash., prior to moving to Arizona. Glendora worked as an occupational therapist and was an active member of the dental auxiliary, the Vera T. Davis Orthopedic Guild, and Girl Scouts. She enjoyed traveling, quilting, and gourmet cooking. Her husband, Dr. Richard Woodcock, preceded her in death. Two daughters, one son, six grandchildren, and one great-grandson survive Glendora.

Floyd Carpenter '68 died peacefully at home in Smiths Grove, Ky., on Oct. 1, 2009. He was 64 years old. A native of Okanogan, Wash., Floyd was a purchasing agent for Airco Mechanical and Apria Healthcare. He served as a navigator in the Air Force and was a Vietnam veteran. Survivors are his wife, Marcia; two sons; and six grandchildren.

Albert Loyd '68 died peacefully at home in Smiths Grove, Ky., on Oct. 17, 2009, at age 82. Born in Fort Sill, Okla., Al went on to earn his M.B.A. from Southern Illinois University Carbondale. He served in the Navy during World War II and received a Purple Heart. Al later enlisted in the Army and served in Korea, retiring after serving as a CID agent for several years. He later returned to service as a member of the Washington National Guard, retiring as a colonel. Al also retired from employment with the state of Washington after 20 years. He was a Freemason, past president of American Legion Post 166 in Turnwater, Wash., and a member of the NRA. Two great-grandchildren preceded Al in death. Al's wife, Greta; five children; 19 grandchildren; and 11 great-grandchildren survive him.

Barbara Brewitt '70 passed away Aug. 25, 2009, in Seattle. She was 60 years old. Barbara went on to earn a master's degree in divinity from Iliff School of Theology in Denver, a bachelor's degree in science from The Evergreen State College, and a Ph.D. in biology from the University of Washington. Over the years she directed a youth employment program for the city of Tacoma, helped establish a whole-food cooperative, served as a counselor and chaplain for Colorado's juvenile correctional facilities, and was a staff fellow at the National Institutes of Health. Barbara's research in the areas of molecular biology and natural medicine led to U.S. and international patents for homoeopathic preparations aimed at improving hormone and immune system imbalances. In 1996 she founded Biomed Comm in order to bring these products to the marketplace. Barbara's research was published in numerous scientific journals worldwide. Her father, Joseph, and brother, Barry, preceded Barbara in death. Survivors include her mother, Cecelia; sister Debbie Brewitt Regala '68; and numerous friends and colleagues.

Peggy Pritchard Olson '72 passed away on Nov. 9, 2009, after a courageous battle with ALS. (See Classmates in Arches, spring 2009.) She was 59 years old. Peggy was active in community affairs for more than 20 years and had served on the Edmonds, Wash., City Council beginning a second term in 2008. She was cited for her “perspective, compassion, sense of humor, and wisdom,” combined with the determination to serve the citizens in her community. Peggy was a long-time volunteer for the Friends of the Edmonds Library and worked to have it made a part of the Sno-Isle Regional Library system. She also was a founding member of the Edmonds Tea Party, which rallied the city against locating the Brightwater sewage-treatment facility on the Edmonds waterfront. In April Peggy was presented with a Senate resolution recognizing her contributions and legacy in Edmonds and in the state, including her accomplishments listed above, as well as her achievements as a founding member of South County Cities Alliance and her 2008 Citizen of the Year award. She was the daughter of Joel Pritchard, the late Washington state legislator, congressman, and lieutenant governor. Survivors are her husband, Norm Olson; her two daughters; a granddaughter; her brother; two sisters; and a whole host of friends who will miss her.

Stuart Moyer '74 died on July 23, 2009, at the age of 70. Born in Everett, Wash., he was a 1956 graduate of Snohomish High School and later Edmonds Community College. Stu served in the Navy and retired from Xerox after 30 years. He enjoyed modified-car racing at Sky Valley and Skagit speedways and followed the sport into retirement. His second wife, Maurine; his two daughters; three stepsons; 11 grandchildren; and many friends survive Stuart.

Charles Hayward '76 passed away on July 11, 2009, at his home in Chehalis, Wash., just four days before his 77th birthday. He was born to itinerant farmers in Clayton, Okla., during the Dust Bowl era. Chuck worked until he was able to join the Army at age 15. One of his first assignments was as a military police officer at the war crimes trials in Japan following World War II. He continued his military service as an infantryman in Korea and Panama, and as an advisor to South Vietnam's army. Chuck concluded his military service as a professor of military science at The Citadel military college in South Carolina. He had a highly decorated military career, including a Second Class Medal of Honor from the Republic of Vietnam, the Army Commendation Medal, the Republic of Korea Presidential Unit Citation, two Purple Hearts, and the National Defense Service Medal, among several others. After retiring from the Army, Chuck worked as a police officer before earning his degree at Puget Sound. He later worked for the IRS in Alaska, retiring again in 1991. Chuck enjoyed hunting, fishing, boating, and gardening. His wife of 54 years, Rheata, and four children survive Chuck.

Katherine Bosch McQueter '83 died on Sept. 18, 2009, just eight days past her 48th birthday. She was a 1979 graduate of Peninsula High School in Gig Harbor, Wash., and worked for many years at Budii Flowers before managing a family-owned hair salon. Two siblings preceded her in death. Her four sons, ages 12 to 16; her father; her parents; six siblings; and a large extended family survive Katherine.

James "J.J." Johnson '88 died on Oct. 7, 2009, as a result of an automobile accident. He was 44 years old. Born in Sunnyside, Wash., he graduated from high school there in 1983. While at Puget Sound, J.J. was a member of Phi Delta Theta fraternity. He worked as a sales representative for Merck and Co., Inc., for more than 20 years, based in Anchorage, Alaska. He later joined Cenntech, a leading biotechnology company. In 1991 J.J. met and married Tracia Eberly. They moved to Freeman, Wash., in 1992. The family enjoyed many adventures, a favorite being vacations to the Hawaiian Islands. His wife, two daughters, his parents, and other extended family and friends survive J.J.

William Chord '89 died at home on Sept. 19, 2009, at the age of 42. Born in Missoula, Mont., Bill graduated from Columbia River High School in Vancouver, Wash. While at Puget Sound he was a member of Sigma Chi fraternity and Alpha Kappa Psi business fraternity. Bill enjoyed cooking, laughing, and entertaining family and friends. He is remembered for his caring nature, infectious smile, and loyal integrity. His father preceded him in death. Survivors include his mother, along with numerous other family members and friends.

Robert Mahan M.S.O.T.'03 passed away on Sept. 16, 2009. He was 55 years old. Born and raised in West Hempstead, N.Y., he served as an altar boy at St. Thomas the Apostle Church there and attended Holy Cross High School in Flushing, N.Y. Bob earned his bachelor's degree from Western Michigan University and an associate's degree from Nassau Community College. Early in his life he worked as a union millwright and as a member of the carpenters' union. Bob's professional life was spent helping others, most recently as an occupational therapist working for Clover Park School District in Lakewood, Wash. He enjoyed playing tennis, cycling, running, and vacationing with his family in Hawaii. Survivors are his wife, Sandra; three sons; three grandchildren; and many members of his extended family.

Heather Ahuero '08 passed away on Nov. 9, 2009, while attending a professional conference as a part of her graduate program at Bowling Green State University. She was 23. Born in Grand Junction, Colo., Bill graduated from high school there in 2004. At earn his M.B.A. from the United Kingdom. Survivors include her mother, father, a sister, two brothers; and many friends survive Stuart.

Winter 2010 arches 37
Donna Bell Cross '56 writes: “My husband and I have moved from Tucson, Ariz., to the Raleigh, N.C., area. What a change. But we are now nearer to all of the 10 children in our blended marriage. I still am a singer—whenever, wherever. I no longer do shows with my karaoke but am in a fine Methodist church choir, where I occasionally do a solo. I just had my 75th birthday and consider it somewhat amazing that I am asked to do so. Thanks to the Internet, I am in regular contact with my wonderful roommate Millie Bulatao Wellington '56. She was our homecoming queen, star of the variety show, etc. I think I went through school known as ‘Millie’s roommate.’ And I am proud to say she is still my very good friend. This is a favorite photo from our sophomore year. I don’t remember what brought this motley crew together—maybe someone’s birthday, as I see a few presents. The two on the top bunk are Nancy Cranston '56 and Maggie Dew Maske '57. Sitting, top left, Elberta Conklin Cohen '56. Second row: Marjorie Moslof '56, Marjorie Casebier McCoy B.A. '56, Hon. '78 (deceased), Joan Warren Evans '56 (deceased), Joanie Wood '56, me, Marlene Peterson Bailey '56, and Evelyn Dodge Joneson '56. Front row: Helene Nagel '56, MaryLu Mackey Sansburn '56, Millie, Arlene Thompson Hinshaw '56, Carla Isaacson Walisch '56, and Pat Thompson Owens '56. My attempt to name all of my friends brought me to my 1953 and 1955 Tamanawas yearbooks. What a journey down memory lane.”

On Sept. 26 the first “Dancing with the Tacoma Stars,” a fundraiser for Tacoma Musical Playhouse, was held in the Temple Theatre Ballroom. One of the “stars” was state Sen. Debbie Brewitt Regala '68 (27th District), who partnered with Rick German '11 to perform the paso doble and the fox trot.

At Homecoming (Oct. 9-10) Bev Melander Gibson B.A. '59, P'93 celebrated her 50th class reunion with family members, from left: son-in-law Bob Jones '86, daughter Julie Gibson '93, and daughter Andrea Brown, mail services coordinator at the university. Bob was a featured speaker on the PacRim Colloquium Panel held that weekend.

Nearly half of the 1959 Pi Beta Phi fraternity pledge class reunited on campus Oct. 9 during Homecoming and Family Weekend. Standing, from left: Joanie Platt Welch '66, Helen Ann Hartley Chapman '62, and Mary Murrills Slaughter '62, P'86. Seated, from left: Ivonna Peterson Anderson B.A. '62, M.S. '64, Phyllis Walker Pyle '61, Bonny Lee Liljebek '62, and Elaine George Brito '62. Also attending though unavailable for the photo was Betty Strobel Jameson '62. The ladies were initiated on Valentine’s Day in 1959.
Since graduation these Kappa Sigma brothers have gathered annually—usually for golf, since Chuck Wolfsborn B.A.'73, P'10 is the owner of Gresham Golf Course in Oregon. The cast of characters who showed up the first weekend in August were: Paul Ferry '71, Rick Aeischlmann '72, Larry Eckert B.A.'72, M.B.A.'84, Larry Vanlaningham '73, Geoff Tookey '74, Richard Santo '73, Steve Westerberg '73, Mike Peyton '77, Bruce Uppinghouse '73, Peter Lobb '76, Tom Brown '73, Chris McCartney '76, Art Samuelson '74, Rick Alvord B.A.'74, M.B.A.'79, Dick Tucker '76, Steve Zimmerman '73, and Pat Anunsen B.A.'73, P'12.

These Tri Deltas from the Puget Sound Phi Zeta chapter found out that they each had been a teacher in some capacity during their careers. They gathered in Tacoma at the home of Joan Davies Rapp B.A.'63, M.Ed.'79, P'90 in August. Joanie writes: "We had a grand time looking at annuals and remembering the good old days." Back, from left: Betsy Reed Sarsfield '63, Karen Sather Fournier '64, Linda Rutledge MacRae '63, Sandy Arnold Ladd '62, Linda Sizer Cockrell B.A.'64, M.Ed.'77, Linda Hartzell Rojas '64, Andi Embree Price '66, and Lisette Shaw Meyer '65. Front, from left: Joanie, Mary Algeo Tatta B.A.'63, P'95, Carolyn Cross Avery B.A.'61, B.M.'62, P'90, and Janet Wright Franzen B.A.'60, P'95.

In November Beta Theta Pi brothers and their spouses gathered for dinner in Seattle. Seated, from left: Nan Davis P'03, Shari Lee Woodcock '71, Gayle Harris, Marian Gordon, and Eileen Fredrickson. Standing, from left: David Davis B.A.'70, P'03, Chuck Woodcock '70, Don Harris '70, Rich Gordon '69, and Jim Fredrickson '70.

Members of Kappa Alpha Theta and Pi Beta Phi gathered in Seattle in August to honor Peggy Atwood Schuster '77. Peggy was a Theta who attended Puget Sound from 1973 to 1975. She passed away in May. (See In Memoriam, Arches autumn 2009.) Following a dinner on Friday evening with 15 attendees coming from as far as New York and California, six Thetas from Peggy's class reminisced the next day at the home of Jody Sloane Gehrmann '77. Front, from left: Barbara Murphy '77, Carol Johnson Ludwig B.A.'77, M.B.A.'81, and Jeannette Frye Wilde '77. Back, from left: Jody, Becky McHollck Cartelli '77, and Cassie Evans Northrup '77.
A '70s reunion of epic proportions took place on Aug. 14-15, 2009. This large group of friends (and friends of friends) gathered from as far away as London, beginning on campus, Friday, Aug. 14. They concluded the weekend with a super-sized picnic on Saturday, Aug. 15, at the Fox Island Yacht Club, Wash., where this photo was taken. Organizers included Lori Bonvicini '75 (correspondent extraordinaire) and Bob Patterson '74 (her loyal assistant), Margo Wilson MacDonald '76 and Bruce MacDonald '76 (food and drinks), and Pete MacDonald '76 (graphics and invites). There were nearly 100 people in attendance. If you'd like to know about future gatherings, send an e-mail message to Lori at lvbonvicini@yahoo.com.

A first-of-its-kind Beta Theta Pi event took place on Oct. 24, 2009, at the Mukilteo home of Hugh Hall '78. About 115 people attended the gathering of 1975 through 1984 alumni, including spouses. Ken Johnson '75 (a former Arches advisory committee member, we note proudly) writes: "We had a great time embellishing stories, inspecting balding heads, and comparing our 'mature weights.'"
This group of alumni assembled on Sept. 19 in Kirkland, Wash., to thank President Ron Thomas for his work and support of alumni throughout the country. Several classmates flew in from California and Hawai‘i to enjoy the weekend. Standing, from left: Bob Isonaga ’76, John Goldwood ’75, Lewis Lawrence ’75, Gaylen Shintaku ’77, Jim Talbott ’75, Curt Peterson ’76, Brad Carter ’75, Harold Lloyd ’75, Laura Inveen ’76, President Thomas, Anthony Brown ’76, Brett Clark ’75, and John Kerwin ’74. Seated, from left: Guy Watanabe B.A. ’75, M.B.A. ’76, Larry Olli ’75, Debbie Daniels Barton B.A. ’75, P ’10, Chris Okuhara ’75, Buster Brown B.A. ’72, M.B.A. ’74, Gordon Kanemaru ’75, Kurt Grimmer ’75, Sandi Wade Kerwin ’75, and Larry Glynn ’75.

On Sept. 17, 2009, Michael Pang ’84, executive director of the Mayor’s Office of Culture and the Arts in Honolulu, helped kick off the Chinese Chamber of Commerce of Hawai‘i exhibit of traditional Chinese watercolor paintings held in the courtyard of City Hall. Michael (that’s him at left, holding the scissors) represented Honolulu’s mayor by participating in a special ribbon-cutting ceremony to officially open the exhibit that ran through Sept. 24.

During a weekend in September a crew from the Beta Theta Pi Class of 1992 converged in Boise, Idaho, for their first reunion in 10 years. From left: Jon Walton [Hey, Jon, how’s that gig at Vandelay Industries working out?], Bill Seymour, Dave Swartley, Matt Allen, and P.J. Franklin (seated); not pictured but also joining this group of alumni who gathered from Seattle, Austin, and New York was Nick Thompson. The weekend culminated with a “lock-in” featuring good food and drink, as well as music by NWA, LL Cool J, and Herb Alpert. The get-together was deemed such a success that the guys vowed to make it an annual event. Look for them next year in your town!

The annual meeting of Phi Delta Thetas informally known as “Andrewfest” is now in its 14th year! This year the traveling band of merrymakers rented an RV and surfed some “tasty waves and camped at San Onofre Beach” in California. From left: Eric Larson ’91, Andrew Alexander ’91, Dave Seeley ’90, David “Vooch” Ursino ’91, Jim Waldorf ’91, and Clint Wallace ’90.

Four alumni and their families gathered for a fun-filled week of skiing in Montana in February 2009. Back, from left: Clint Wallace ’90 and Dave Seeley ’90. Middle, from left: Roseann Sullivan Seeley ’92, Xander Wallace, Alison Anderson Wallace ’91, and Finnegan Wallace. Front, from left: Lukas and Kristen Seeley.
Zane McCune ‘92 and wife Valerie attended Homecoming Weekend with their daughter, Hope LeiAnn, almost 3. Zane writes: "We enjoyed the BLP and Phi Mu Alpha reunions, as well as the Logger football game. After running into George Mills, VP of enrollment, we were convinced Hope is destined to be a member of the Class of 2029!" Zane has been with Wells Fargo Bank for the past 10 years as vice president, Northwest Region, and is active with the BLP mentor program. Valerie is a consultant with RLR Management Consulting, Inc. The two have three children (including Jessica, 21, and Michael, 16, not pictured) and live in Kent, Wash.

Lisa Herlinger ’95 married Blake Esco on Sept. 12, 2009, at Hidden Springs in Camas, Wash. Jenny Tsoulos ’95 was her bridesmaid. Other Puget Sound friends in attendance, though some aren’t pictured here, were: Angie Bagg Lutz ’95, Erik Prowell ‘96, Josh Hindson ’95, Andrew James ’96, Darren Minami ’95, Elliott Waldron ’94, Amy Roberts ’94, Melanie Bonadore ’94, Andrea Meyer ’95, Heather Palmer Goff ’97, Rob Goff ’95, Mika Tsongas ’95, Ramsey Phipps ’96, Hari Sreenivasan ’95, Dave Ichikawa ’96, Jenna Brostrom Ichikawa ’96, Mike Morris ’96, Mike Smith ’95, Courtney Magnuson Davies ’95, Chris Allen ’94, Emily Miller Allen ’95, and Kelly Boyden Owens ’96. Lisa continues as the "creator" of Ruby Jewel, maker of handmade ice cream sandwiches. You can find her online at www.rubyjewel.net or be her friend on Facebook. Blake is a chef at Simpatica Catering in Portland, Ore.

Julie Gilbert Anderson ’92 and Lisa Simonson Anderson ’91 celebrated 22 years of friendship with lunch in Bellevue, Wash.—from freshman roommates, to busy wives, mothers, and occupational therapists, it seems the two were destined to be friends. In response to Arches' query about the significance of the two having the same married last name, here's Lisa’s reply: "God had a plan when he placed us in the same room on the top floor of University Hall. Our dads both worked in the computer industry, our moms have the same first name, our younger siblings are the same age, and believe it or not we were both late to marry—about the same time. Our hobbies and interests were very parallel, and not too surprising, we both received degrees in OT—specializing in pediatrics. We both married unrelated men with the last name of Anderson—my husband graduated from UPS [Steven Anderson ’88], and Julie’s husband graduated from PLU. Our similarities were so dramatic, as well as our appearances, we received the nickname ‘bookends.’ Though I never had a biological sister, I received one at UPS—the first week of school! What a blessing a lifelong friendship is.”

Michael Tierney ’95 and wife Rachel welcomed son Jude Patrick Tierney— pictured here in his first Puget Sound onesie—to their family on Oct. 18, 2009, Michael reports that everyone is doing well.

Jason Mangone ‘95 climbed 18,619-foot Pico de Orizaba, Mexico’s highest peak and North America’s highest volcano. He personally financed the November climb to help raise awareness and solicit donations in support of Children’s Miracle Network. Jason is the director of finance for FirstGroup America’s First Transit division, based in Mason, Ohio, where he and his wife, Jaime, live with son Oliver, 1.
Abigail Knight '98 and Vasili Arvanitidis '02 were married at the Semiahmoo Resort in Blaine, Wash., on Aug. 8, 2009. The wedding party, from left: Larissa Pease Kosla '98, Rachel Long '98, Nicole McKenney Forrest '98, Maureen McLaughlin, Darcy McLaughlin, Kimberly Knight Anderson, Julia Knight, Eleanor Knight, the bride and groom, Jon Breiner '02, Alexi Arvanitidis, Thanasis Athanasiadis, John Tillman, Matt Gerdes, Pano Pappas, John Marrone, and Rob Egdemin. Front row: Ryan Juett and Kassandra Hickson. Several other sorority sisters and friends attended, including Shelly Richardson Heier '98, Jennifer Peterson Grusz '98, Lyndy Stone-Walsh '98, Dulcy Crabbe Hixson '98, and Megan Haynes Johnson '98. The newlyweds honeymooned in the Greek Isles and make their home in Seattle.

On Aug. 5, 2008, Kit Clark '01 and Walt Jones '01 welcomed their first child, Connor Ryan Jones. Walt continues to be entrenched in the design and creation of high-end feature film visual effects at Rhythm and Hues Studios. He recently completed work on Night at the Museum: Battle of the Smithsonian. In 2008 he shared an Academy Award for Achievement in Visual Effects for work on The Golden Compass. He also continues to gain prominence as a fine-art photographer, showing this year in several exhibitions around the country while shooting new work in his virtually nonexistent downtime. After taking a few months off following Connor's birth, Kit returned to work as a genetics counselor at Cedars-Sinai Medical Center in Los Angeles, working with high-risk prenatal patients.

Bao Le Ng '02 writes: "Chin [Ng '00] and I took a trip to Oahu, Hawai'i, to attend the wedding of Kiyoshi Shiraiishi '00 and Kym Yano '03. We met up with Lance Kimura '02 for our traditional 'happy Asians photo.' From left: Lance, Bao, and Chin.

On Aug. 5, 2008, Kit Clark '01 and Walt Jones '01 welcomed their first child, Connor Ryan Jones. Walt continues to be entrenched in the design and creation of high-end feature film visual effects at Rhythm and Hues Studios. After taking a few months off following Connor's birth, Kit returned to work as a genetics counselor at Cedars-Sinai Medical Center in Los Angeles, working with high-risk prenatal patients.

Susanna Selig Abrahamson '97 and Patrick Abrahamson '96 celebrated their 11th wedding anniversary in July 2009 with a party at Edgefield Winery in Troutdale, Ore. From left: Lynette Mischkot '96, Kathy Scott Bokenkamp '96, Stacey Wilson '96, Susanna, and Christie Gove Berg '96. In case you're wondering about the outfits, the theme was to wear an old bridesmaid dress. Also present, although not pictured: Courtney Ferguson '97, Jamie Hicks '97, and Stefanie Hill '97.

Cameron Phillips '02 graduated from the University of Washington School of Medicine in June. He is now a surgical resident at the University of Washington in Seattle, where he and wife Alyssa Norris Phillips '01 live.

Jenifer Fuerte B.A.'01, M.A.T.'02 married Jeremy Hunt on Dec. 27, 2008, in the midst of last year's big snowfall. They even had to bulldoze the parking lot before the ceremony! Family and friends—including Joe Fuerte '03 and John Harpel M.Ed.'01—heaved the weather to attend from as far away as Colorado and California. Jenifer and Jeremy met "in the boys locker room" almost four years ago while coaching middle school track and volleyball in Federal Way, Wash. They both continue to teach and coach several sports, both at the middle school and high school levels.

Winter 2010 arches 43
Brynn Hambly '02 and John Kaufmann were married on June 21, 2008, at Volunteer Park in Seattle. Many Loggers were in attendance. Back, from left: Kate Cohn '00, Rebecca Harrison '01, Ellie McKay '05, Nicholas Williams '01, Didi Bethurum '01, the bride and groom, Angela Bakke '01, Mary Archais '02, Wynn Rankin '01, Joy Fischer '00, Mairi Chisholm '02, Theo Smith '00, Sherwin Baghal '02, and Cristian Norman '02. Front, from left: Britton Russell '02, Alexa Vanselow '00, Jason Cirecelli '02, Liz Beaulieu '02, Chris Bachman '02, and Kristin Williamson '02. Brynn and John now live in Iowa City, Iowa, where they are both in graduate school.

Members of the 1999 Puget Sound men's soccer team and coaching staff gathered on campus over Halloween weekend to honor past on-field achievements and support the current team. Leaving an indelible mark on the record book, the '99 team finished the season with a program best-ever #6 national ranking and a 20-2 record. Guided on the field by two All-Americans and seven All-NWC selections, the team remains tight off the field and prominent in the minds of current players and coaches. "This was a special group of men that completely bought into what it means to be a team. They played the game with pride and passion. The bonds between teammates, with Puget Sound, and with current players are evidence of how much it meant and still means to them. I am thankful everyone took time to return to campus and reunite in this great way," said head coach Reece Olney. Front row: Jeff Craig '00, Koben Calhoun '03, Josh Hedrick '06, Loren Cohen '03, assistant coach '98-'02 Brian Sponsler '97, Jorgen Peadon '05, Erik Nielsen '02, and Mike Rottersman '99. Back row: Justin Hughes '04, Josh Snyder '05, Adam Vance '02, Chris Phillips '03, Jon Walls '02, Kevin "Goose" Weldkamp '00, Chris Raymond '03, Eddie Zielinski '03, assistant coach '00-'04 Kevin Zamira '00, and David Genge '03.

Edward DuVivier '03 was married in July 2009. He and wife Heajeong live in Burbank, Calif., where Edward works as a water treatment operator for SouthWest Water Company.

Eric Ankrim '03 played the lead in the Seattle Children's Theatre production of Peter Pan that ran Nov. 13, 2009-Jan. 10, 2010. Also involved at the theater was production assistant Holly Coombs '08 and Ellie McKay '05, who is on staff at Seattle Children's Theatre as the education program manager. From left: Ellie, Eric, and Holly.

Brandon Cossel '01 and Jackie Kajdzik Cossel '00 are proud to announce the birth of their first child, Aurora "Rory" Willow Cossel, born on March 24, 2009. They spent their first summer as a family camping and hiking in Mount Rainier and Olympic national parks, and they took Rory to her first Seahawks game.
Jennifer Creek '04 and David Hughes '04 were married on June 27, 2009, at Vista Hills Vineyard and Winery in Dayton, Ore. Puget Sound friends in attendance were, from left: Angela Williamson B.A. '03, B.S. '05, D.P.T. '08, Robin Bruce-Alijan '04 (who also served as officiant), Holly Thorsen '04, Josh Haberman '04, Darrel Frost '04, the groom and bride, Tessa Studebaker '04, Nora Palenchar Golden B.M. '04, M.A.T. '06, Jason Golden '04, Kat Griffin '04, Cheryl Budisch Steighner '04, and Erik Steighner '03. Since graduation David and Jennifer have lived in New York City, where David is a marketing consultant for nonprofits, and Jennifer is a piano accompanist at several area schools.

Heather Francis '04 and Matt Bisturs '04 were married on July 18, 2009, in Sunriver, Ore. Fellow Loggers celebrating their marriage, back, from left: Lonn Johnston '04, Ben Avery '04, Brad Czajkowski '04, and Byron Collins '04. Front, from left: Phil Gloudemans '04, Brian Olin '05, Emily Baxter Grankowski '03, Melanie Maynes Lopez '05, Annie Odell '04, the bride and groom, Celeste Orser Blay B.A. '04, M.A.T. '06, Maya Anderson '04, and Jason Fie- man '04. Since earning his law degree in 2007, Matt has worked as an attorney for Schwabe, Williamson and Wyatt in Vancouver, Wash. Heather completed her M.B.A. in 2007 and works in human resources as an HRIS/compensation analyst for FLIR Systems.

At Bihoro Pass overlooking Lake Kussharo in Eastern Hokkaido, Japan, from left: Laura Hannah '04, Kat Griffin '04, and Justin Genziano '05. Justin has been working as an assistant language teacher with the Kitami City Board of Education on Hokkaido for the past 18 months. Kat and Laura had an opportunity to visit Justin in September 2009 and report having a fabulous time touring the island with him. Laura and Kat both reside in the Bay Area. Laura works for SolarCity as an engineering program manager, and Kat is a partnership manager with BabyCenter LLC.

Joanna Hartman '04 married Alex Close on Aug. 29, 2009, in an outdoor wedding and reception at Lake Tahoe, where the couple met working side by side as reporters at a local newspaper. Several lady Loggers were in attendance. Back, from left: Megan Margeson '05, Gretchen Heinzen Thorne '04, bridesmaid Kathleen Sullivan '04, Amy Temes Clifton '04, and Anna Price-Meader '04. Front, from left: Aleisha Smith '04, the groom and bride, maid of honor Stacy Muffy Shine '04, and Anna Hadley '04.
Julia Becker '05 and Andrew Vieweg were married on Aug. 1, 2009, at the Lansdowne Resort outside of Washington, D.C. Loggers in attendance were bridesmaids Jenny Mosher '05 and Katie Bishop '05, as well as James Rightmire '05, Liz Ruiz-Puyana '05, and Erik Bergset '05. Also pictured is honorary Logger bridesmaid Kristen Kent, who spent a lot of time on campus. Julia and Andrew live in Alexandria, Va., where Julia works at the U.S. Government Accountability Office in the International Affairs and Trade division, and Andrew works as a senior consultant at the firm Booz Allen Hamilton.

Cody Swift '07, left, and Emily Schwartz '07 attended the International Drug Policy Reform Conference in Albuquerque, N.M., Nov. 12-14, 2009. Cody works for the ACLU of Washington on the Drug Law Reform Project, and Emily was working at the King County Bar Association's Drug Policy Project. She writes: “We were there to learn about the many failed aspects of the War on Drugs and listen to the most widely renowned researchers in the field. Sessions included international drug issues, cutting-edge marijuana debates, psychedelics, and drug treatments.”

Amy Thompson '07 and Joe Gustafson '05 were married on July 4, 2009, at St. Patrick's Catholic Church in Portland, Ore. The two met at Puget Sound in 2004 and have been together ever since. Many Logger alumni attended the wedding and reception at Persimmon Country Club in Gresham, Ore., including, from left: Kelsey Weidkamp B.S.'04, D.P.T.'09, Chelsea Zarnowski '07, John Lorge '08, Jessica Wise Facque '05, Heather Primrose B.A.'07, M.A.T.'08, Alexis Kerns '08, Kelda Kast '05, Emily Cranston '07, Leslie Mayer '07, Pete Marcek '07, Amy Kast '10, Kaitlin Paulson '07, Ryan McNinch '06, Shawna Andersen '07, Carlie Meader '07, Tanner Savage '05, Kyle Mohagen B.A.'05, M.A.T.'06, Nick Haswell '05, Josh Walker '05, Alex Facque '06, Andrew Parker '08, John Hines B.A.'05, M.A.T.'06, Pat Riley '06, and Nick Da Valle '05. In front: Amy and Joe.

Alicia DeBoer '07 and Joe Adamack '08 were married on Aug. 15, 2009, in Ocean Shores, Wash. Puget Sound alumni in attendance were, back, from left: Matthew Bonniwell '08, Alex Twist '08, Tristan Orford '08, Marty Whittle '08, Travis Tittus '10, Kohl Metzger '07, and Andres Hilbrunner '06. Front, from left: Joanna Ricken '08, Briana Van Over '08, Victoria Pane '07, the groom and bride, Jennie Zimburcan '07, Tracy Hagen '07, Alia Broman '07, Emily Knudsen '07, and Ingrid Greiser '07.

Denise Marks Tracy '06 sends this update: “On Feb. 20, 2009, my husband, Michael, and I were thrilled with the birth of our twin daughters. Samantha (in pink) weighed 5 pounds and 12 ounces, and Laura (in purple) was 5 pounds and 5 ounces at birth. They are both healthy and happy. As a bonus, they sleep through the night! We also just purchased our first home, in Bremerton, Wash., where Michael works as an engineer at Puget Sound Naval Shipyard.” The girls are pictured here at 8 months old.
A very large Logger contingent came out for the wedding of Erin Roberts '07 and Mike Cuseo '05 on Aug. 15, 2009, in Marblemount, Wash. From left: Jim Frederickson '70, Paul Kristensen B.A.'69, P'04, Laurel Bandy '07, Gary Teichroew '68, Aimee Schulte '07, Sandy Browning Teichroew '69, Angela Hargett '07, Rich Gordon '69, Whitney Ogle '07, Susan Jackson '68, the bride and groom, David von Moritz '07, Joel Higa '07, Ann Kurriger von Moritz '08, Emily Engvall '08, Harry Van '08, Erica Toelle '05, Dylan Ferry '08, Erika Herbst '07, Tony Vongdara '08, and Robert Whiting '05. Not pictured: father of the bride Rick "Freddy" Roberts B.A.'69, P'07.

Rogers "Supersoak" Hawley '05 sends this update: "This past August I embarked for a week of hiking in the White Mountains of New Hampshire to join Drew 'Fidget' Gemmer '06 who had been hiking northbound on the Appalachian Trail since early April. (Fidget was his trail name.) He made it to the northern terminus atop Mount Katahdin on Sept. 10. [See photo at right.] This photo of us is atop Mount Washington, home of the 'worst weather in the world.' Rogers lives in Seaside, Calif., where he works full time for his family's real-estate company and part time at their banana stand by the pier.

Drew "Fidget" Gemmer '06 writes: "I hiked the Appalachian Trail this year, starting April 5 and finishing Sept. 10—2,178 miles all told. I was joined by Rogers 'Supersoak' Hawley '05, Rob 'Beefmaster' Keely '06, Laura 'Hammertoes' Read '06, and Charles 'Fannypack' Leung '06. They didn't accompany me for the whole hike, but joined me for portions along the way. I certainly couldn't have done it without their support. The names in quotes were their trail names. I'm back in Portland now, trying to readjust to life after the trail."

Summer Reunion Weekend!

June 4-6, 2010

Come back to school!
• Head back to the classroom for Alumni College
• Stay in the dorms (if you dare!)
• Celebrate at reunion events (for classes ending in 0 and 5)
• Have fun at the all-Greek reunion
• Share stories and meet friends at the campus picnic

Join the party!
